Part 1 — Research

Introduction

The purpose of this document is to fulfil the needs of the OPSC7311 POE (Assignment), specifically for Part 1 of the assignment. This document will be used in the research section of our overall POE Part 1. The different section that must be complied with are broken down in the ‘Table of contents’ in different headings for the sake of convenience.

The purpose of this document is to record research done on three separate web applications; we have been tasked with using these three web applications to help us develop a web application of our own. Our application is a Mobile Application, so we our using other applications like it in order to create a more well-rounded app with fully developed functionalities and capabilities.

We will provide an overview of each application’s structure, the strengths and weaknesses of each of them and any innovative features that the app has added or created themselves. We will be using terminology used by The IIE (2023) for better clarity.

Research was conducted using Jim Wilson (2016) and Sylvain Ratabouil (2015) resources materials, to get the most accurate and useful data in our research.

Breakdown of each app, how we evaluate the three chosen applications:

a) Overview of the app, including screenshots with descriptions.

b) Strengths and weaknesses of the app.

c) Innovative features of the app.

App One: QuickBooks Time Tracker

Overview of the app, including screenshots with descriptions:

‘Time tracking and scheduling software employees love. GPS enables. Free support‘– QuickBooks (2023)’s Google Play ‘About this app’ section.

QuickBooks (2023) is used to track and schedule an employee or group of employees together with their work tasks.

Screenshots:

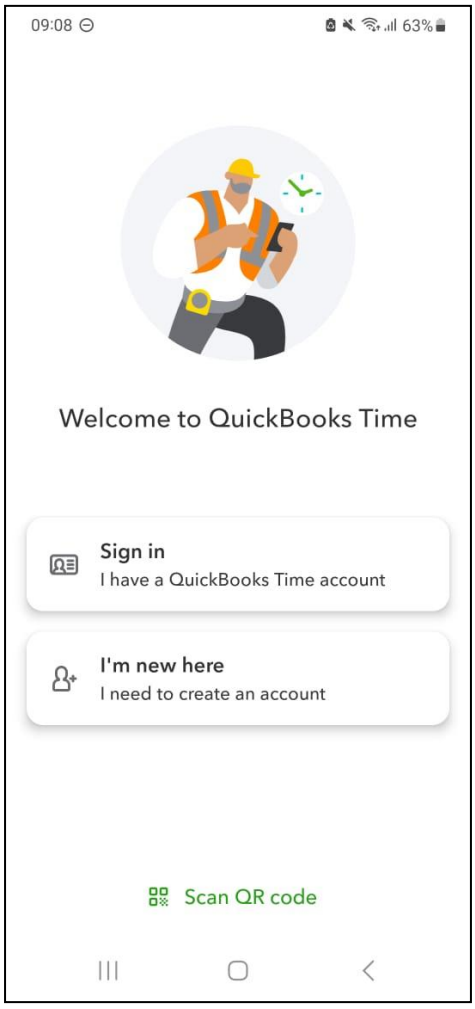

Figure 1 (QuickBooks, 2022)

The 'Welcome to QuickBooks Time' Page ('Sign in or Signup' Page)

You can Sign in to or create a brand-new account.

'Sign in' is to access your current account.

'Signup'' is to access your current account.

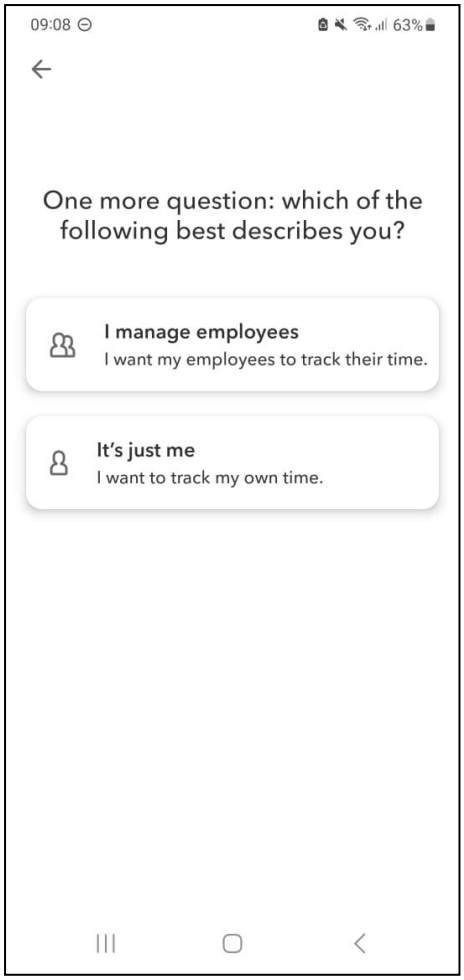

Figure 2 (QuickBooks, 2022)

The 'Describe your app needs' Page.
You state the purpose and needs of your account.

You can specify whether you are just one individual or that you manage other employees.

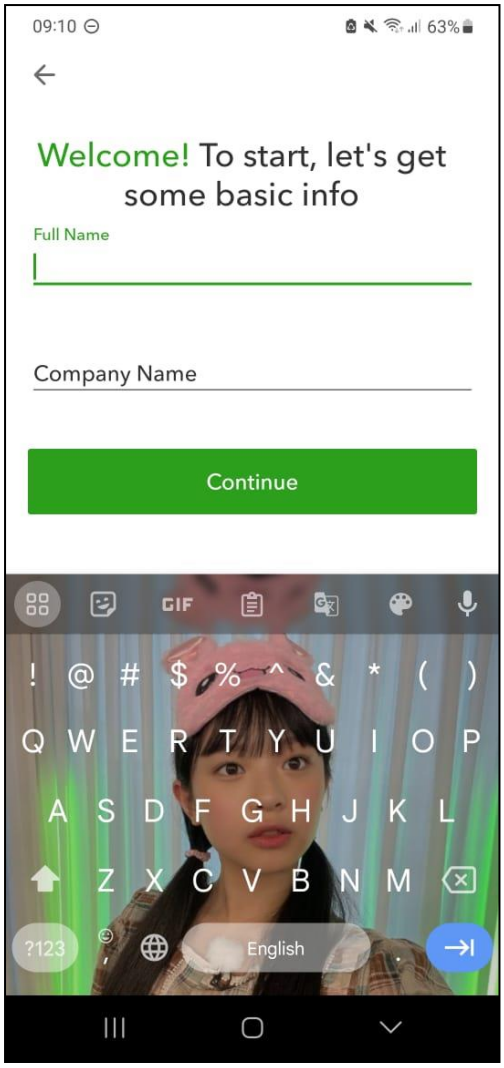

Figure 3 (QuickBooks, 2022)

The ‘Welcome’ Page.

You can add your details such as Full Name and Company Name.

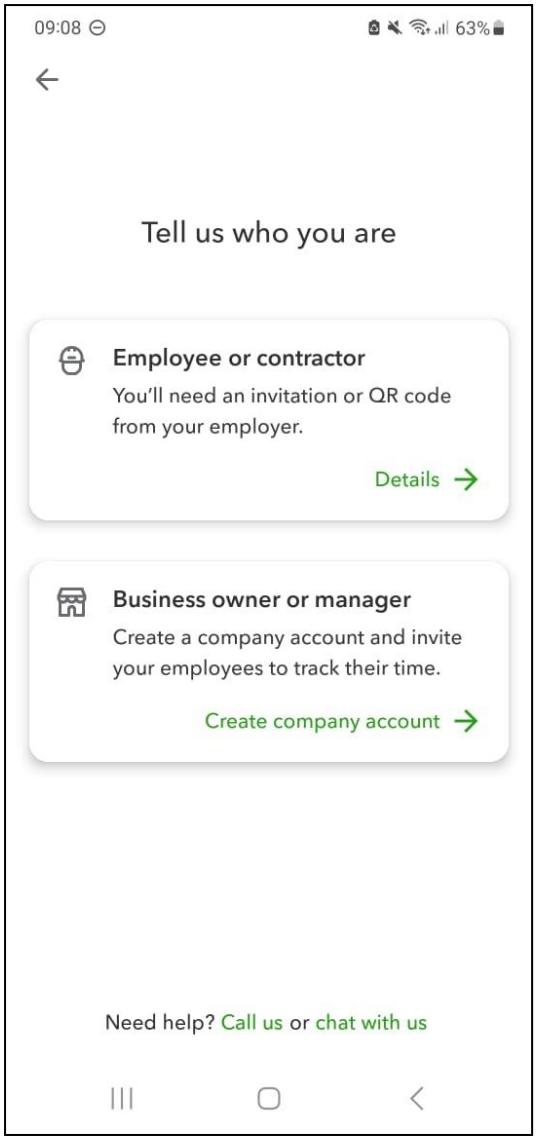

Figure 4 (QuickBooks, 2022)

<u>The 'Tell us who you are' Page.</u>
State whether you are an employee/contractor (if an employee you will need a QR code) or business owner/manager (You can create a company account and invite others to it).

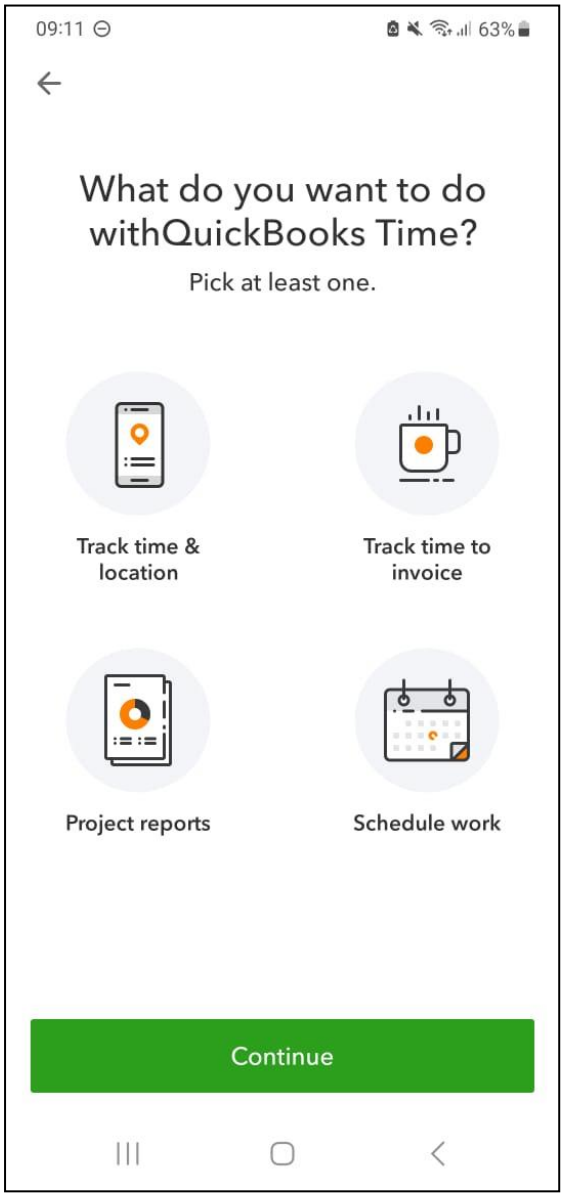

Figure 5 (QuickBooks, 2022)

The ‘What do you want to with QuickBooks Time? Page

Describe your type of work. You can you pick at least ONE of these options.

The Options are:

*‘Track Time and Location’

*‘Track time to invoice’

*‘Project reports’

*‘Schedule work’

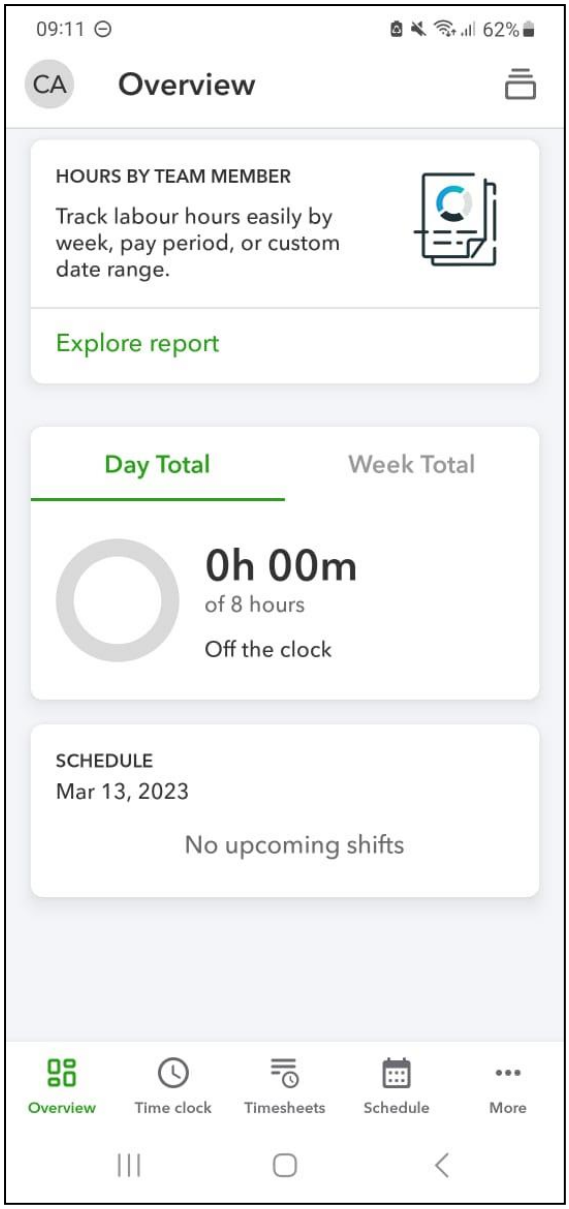

Figure 6 (QuickBooks, 2022)

The 'Overview' Page

It helps track hours spent on work, it can also be used total up certain numbers of hours as well as keep track of upcoming schedules.

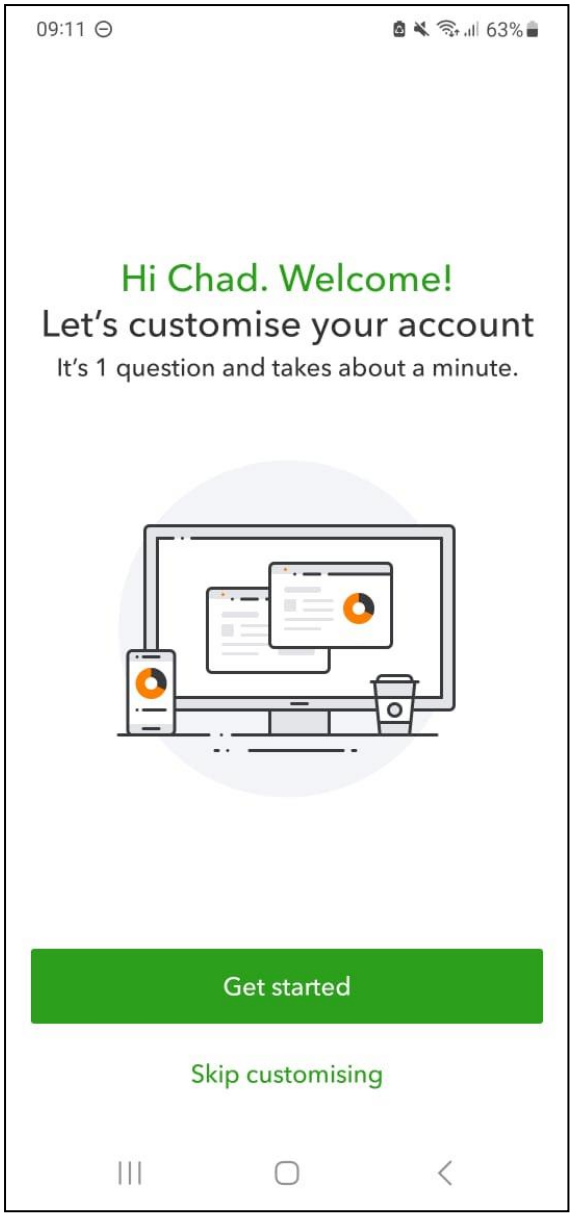

Figure 7 (QuickBooks, 2022)

The 'Hi' Page

Displays once you completed previous steps, the account will be ready to customize.

This Page is displayed when create an account.

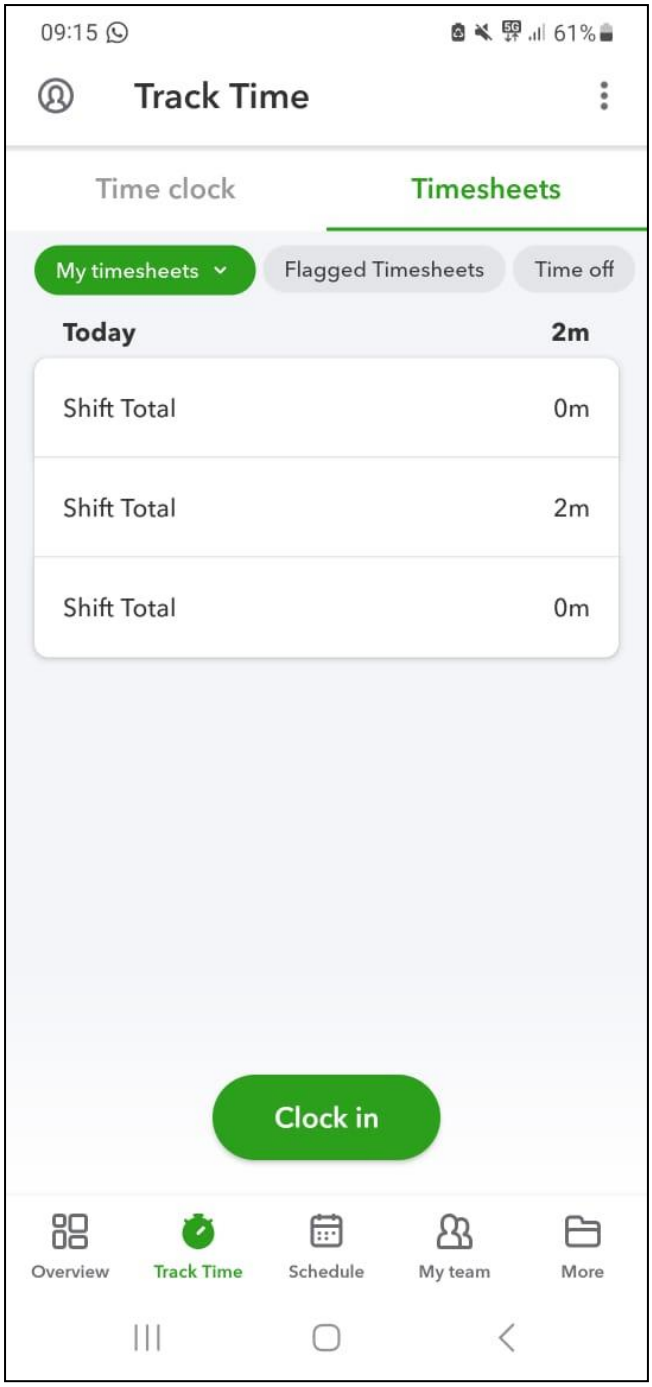

Figure 8 (QuickBooks, 2022)

The ‘Track Time’ Page
Tracks time spent in your Timesheets.

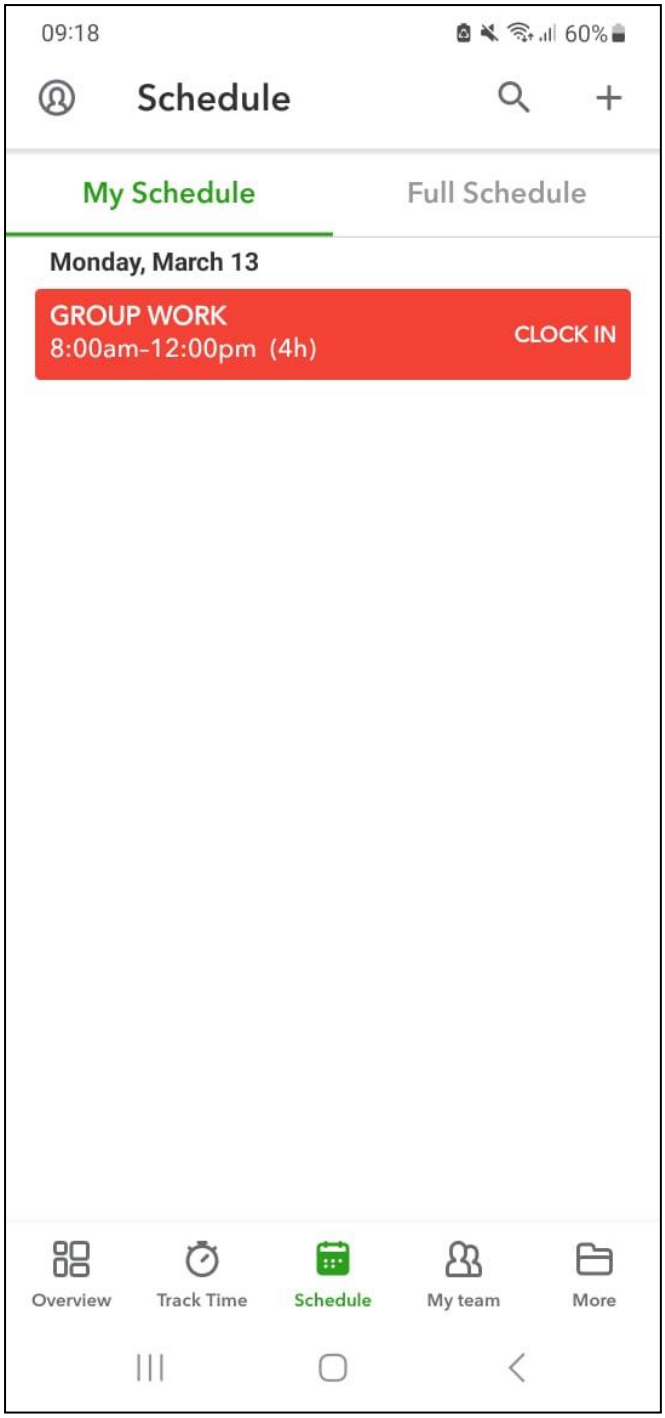

Figure 9 (QuickBooks, 2022)

The ‘Schedule’ Page

Shows scheduled sessions, it will indicate your personal schedule and inform you on its urgency.

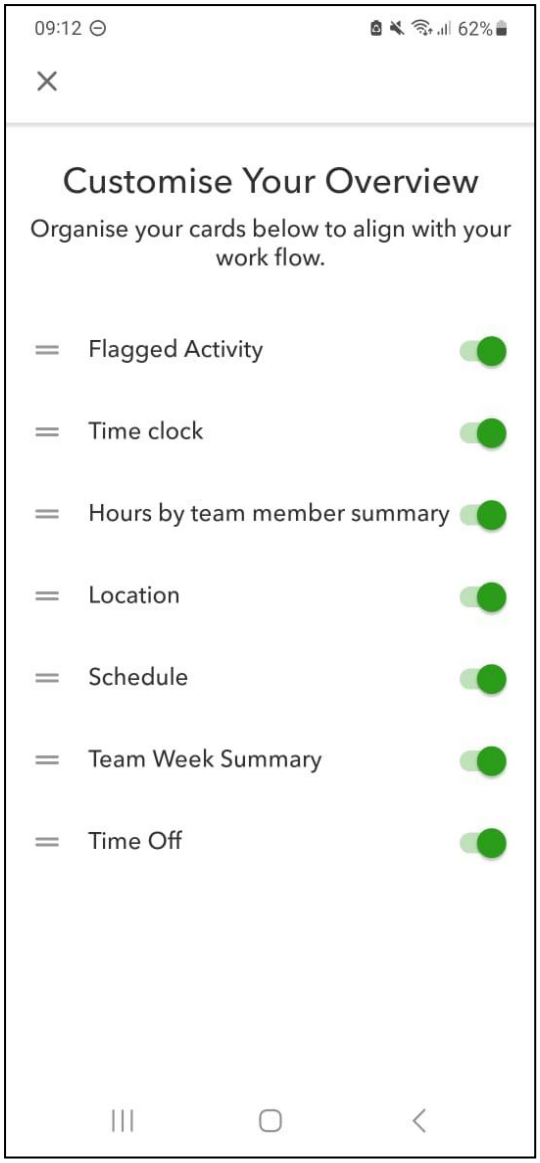

Figure 10 (QuickBooks, 2022)

The 'Customize Your Overview' Page.
Specifies what card is appropriate for your work flow. You are given the chance to choose the functions you want to have on your account

Your choices are:

- Flagged Activity' – Allows you to 'flag' an activity.
- Time clock' – A clock function is added.
- Hours by team member summary' – Summaries the data regarding employee hours.
- Location' – Allows you to add or indicate your location, for the GPS tracker.
- Schedule' – add a schedule functionality.
- Team Week Summary' – An option is added to summaries the work done by your team during the course of a week.
- Time Off' – Indicates time off from work.

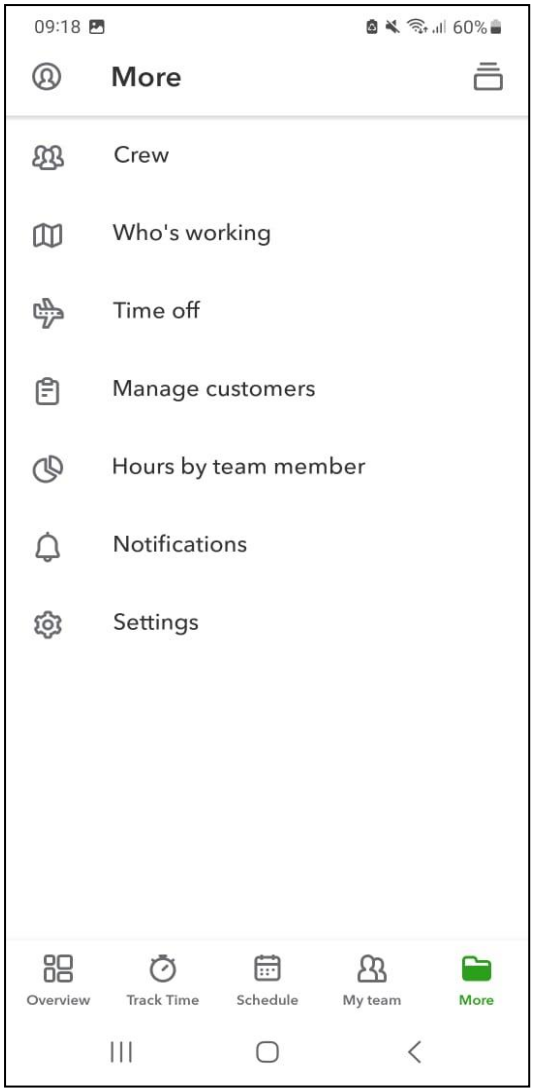

Figure 11 (QuickBooks, 2022)

The ‘More’ Page

The additional functions of the App, where you can select other features that could not be displayed on their own.

You can specify:

- Crew – Those working with you.
- Who’s working – Displays the person/people working currently.
- Time off – Time spent off from a given task.
- Manage customers – allows you to manage customer details.
- Hours by team members – Displays hours spent by individual team members.
- Notifications – Notifies you or events.
- Settings – Allows you to adjust app functions.

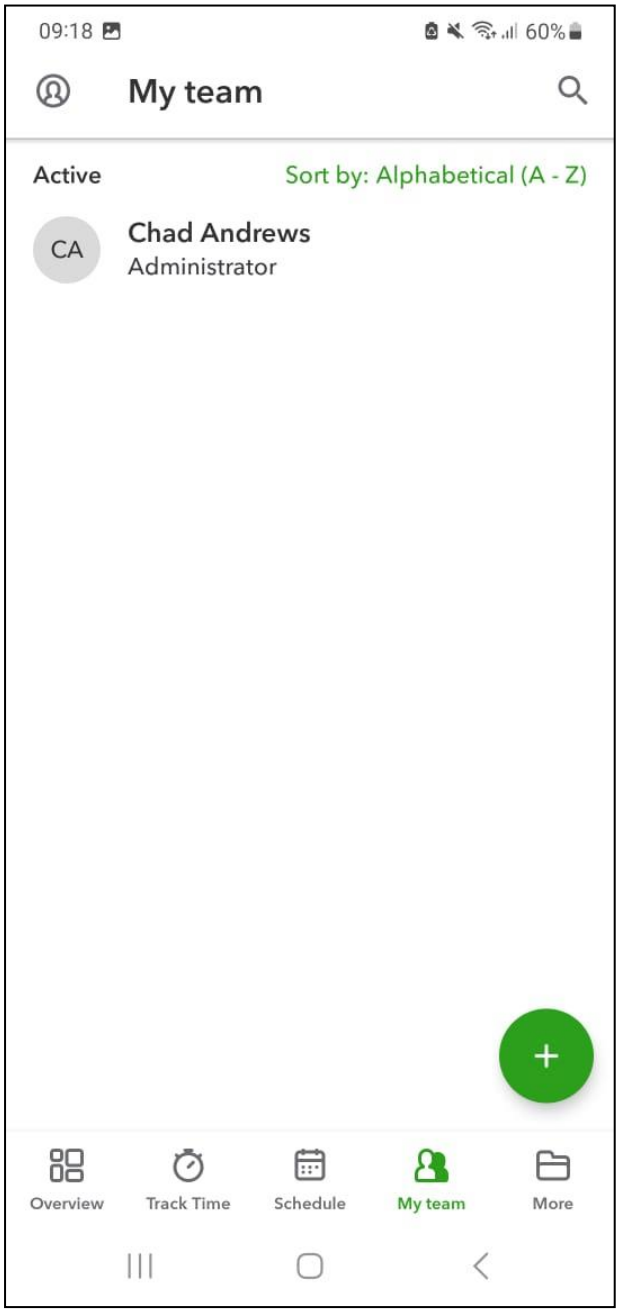

Figure 12 (QuickBooks, 2022)

The ‘My Team’ Page

Your own personalised team, it indicates who the administrator is, the other members and whether they are currently active or not.

Strengths and weaknesses of the app

Strengths:

- Large range of functions and personalization features.
- Easy to read wording and presentation.
- Excellent UI design.

Weaknesses:

- Not enough explanation of features.
- Bland web design, nothing catches the User's eye easily.
- Too many unneeded functions that could lead to user confusion.

QuickBooks - Critics Review

*Pros:

- Elliott (2023) says 'QuickBooks Time mobile apps track time, schedules and mileage'.
- Elliott (2023) says 'It has geofencing and GPS tools to monitor locations and remind staff to clock in or out'.

*Cons:

- Elliott (2023) says 'QuickBooks Time charges a monthly base fee plus per-user fees'.

*Editor's score: '95/100' (Elliott, 2023)

Elliott (2023) says 'QuickBooks Time is an ideal time and attendance system for mobile workforces, including remote and field teams' (Quickbooks, 2023).

Innovative features of the app

It includes the ability of GPS enabling, to help track your position and time of arrival when travelling so that you will be able to adjust and alter your times accordingly (QuickBooks, 2023.).

App Two: Boosted Time Tracker

Overview of the app, including screenshots with descriptions:

‘Track your activities and take control of your time!’ – Boosted (2023)’s Google Play ‘About this app’ section.

Boosted (2023) allows consumers to perform generalised activity tracking.

Screenshots:

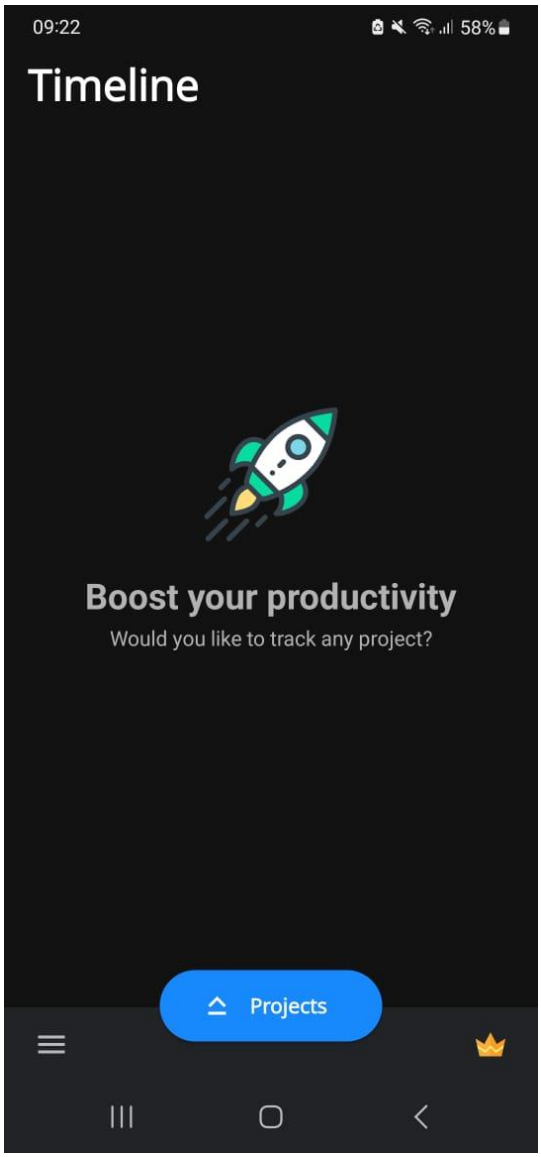

Figure 13 (Boosted, 2023)

The ‘Timeline’ Page

It allows you to add any new projects to your account.

Figure 14 (Boosted, 2023)

The ‘Boosted Premium’ Page

Allows you to upgrade your App to a version with more options, it lists all of the additional features that can be accessed by updating your account to ‘Boosted Premium’.

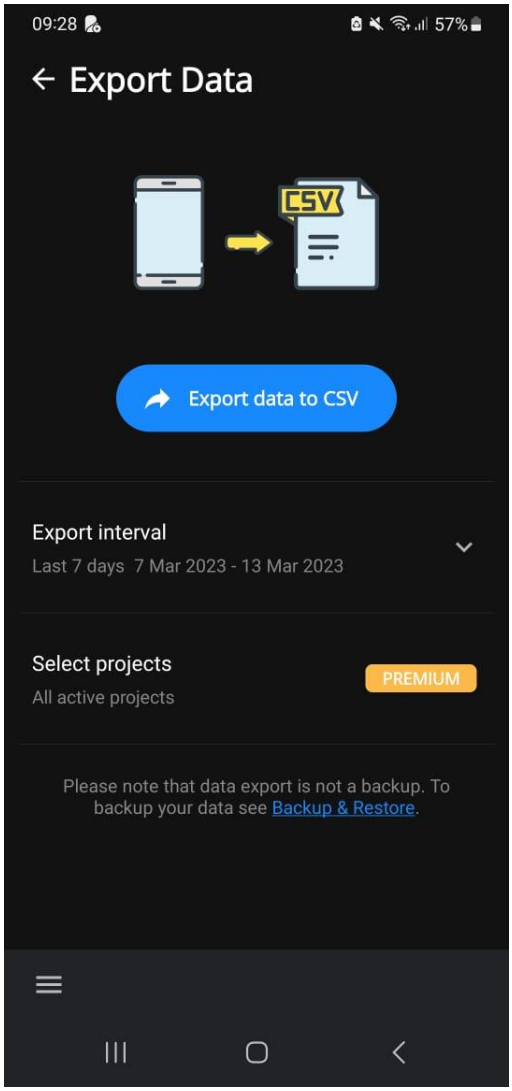

Figure 15 (Boosted, 2023)

The ‘Export Data’ Page

Allows you to send data you have created to CSV, which is used to generate a comma separated value (CSV) representation of a project, package, or folder.

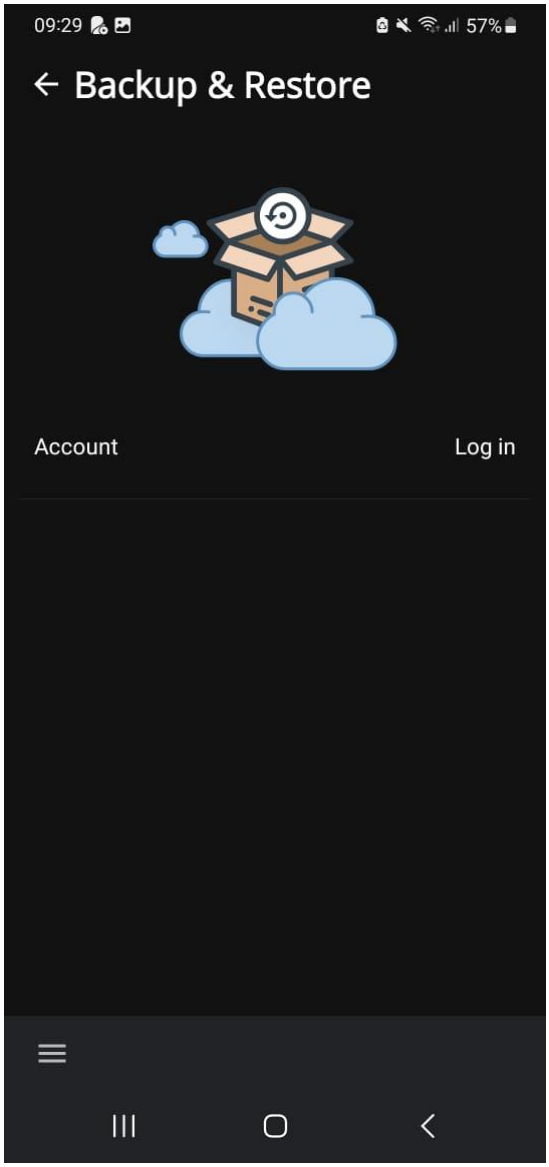

Figure 16 (Boosted, 2023)

The ‘Backup and Restore’ Page

Allows you to backup current data and to restore any item that was deleted. This can be used to restore any important data you need for one of your projects.

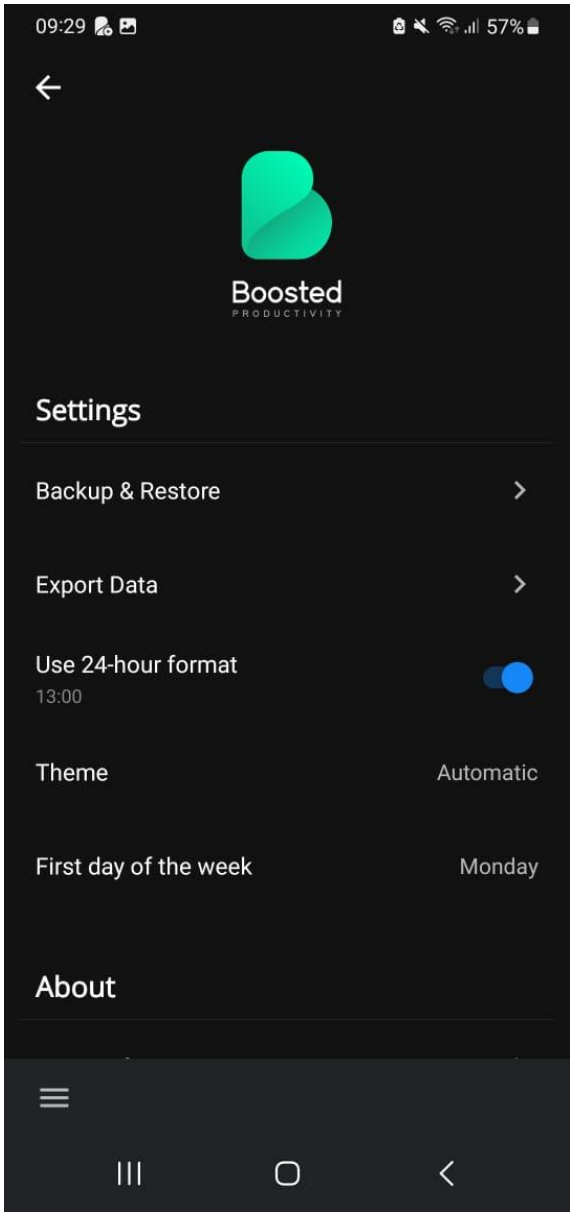

Figure 17 (Boosted, 2023)

The ‘Settings’ Page

Allows you to adjust and personalise App settings.

Settings include:

- Backup & restore
- Export Data
- Use 24-hour format
- Theme
- First day of the week
- About

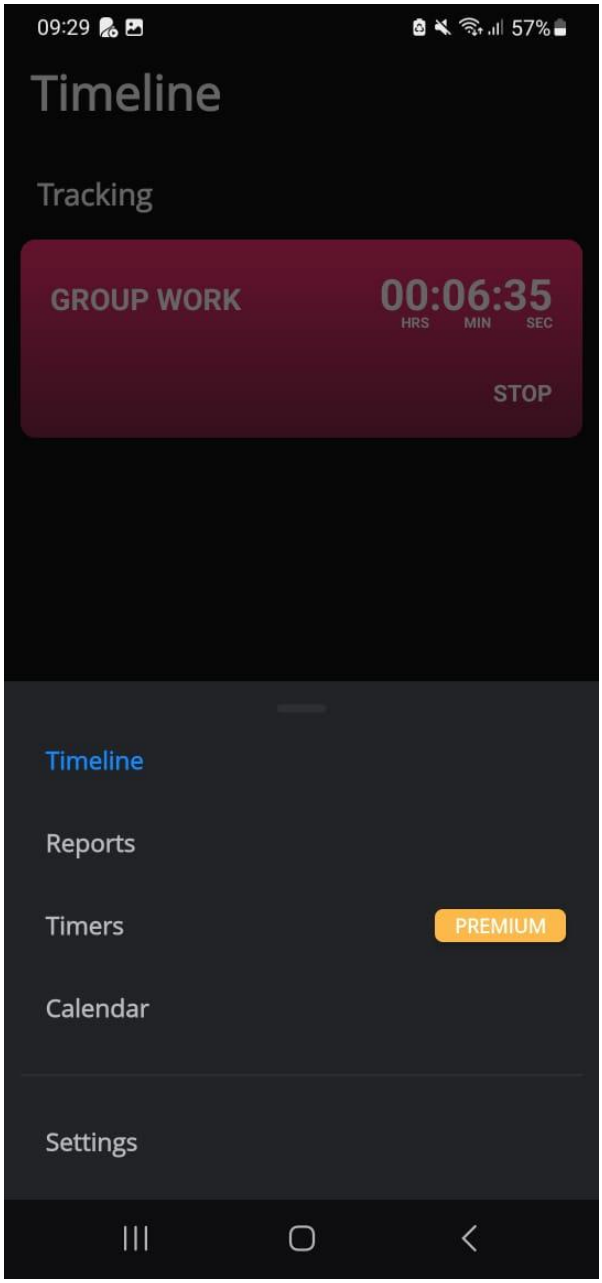

Figure 18 (Boosted, 2023)

The ‘Timeline’ Page, with Premium features

Displays additional functions available to those that upgrade their account (specifically the ‘Timer’).

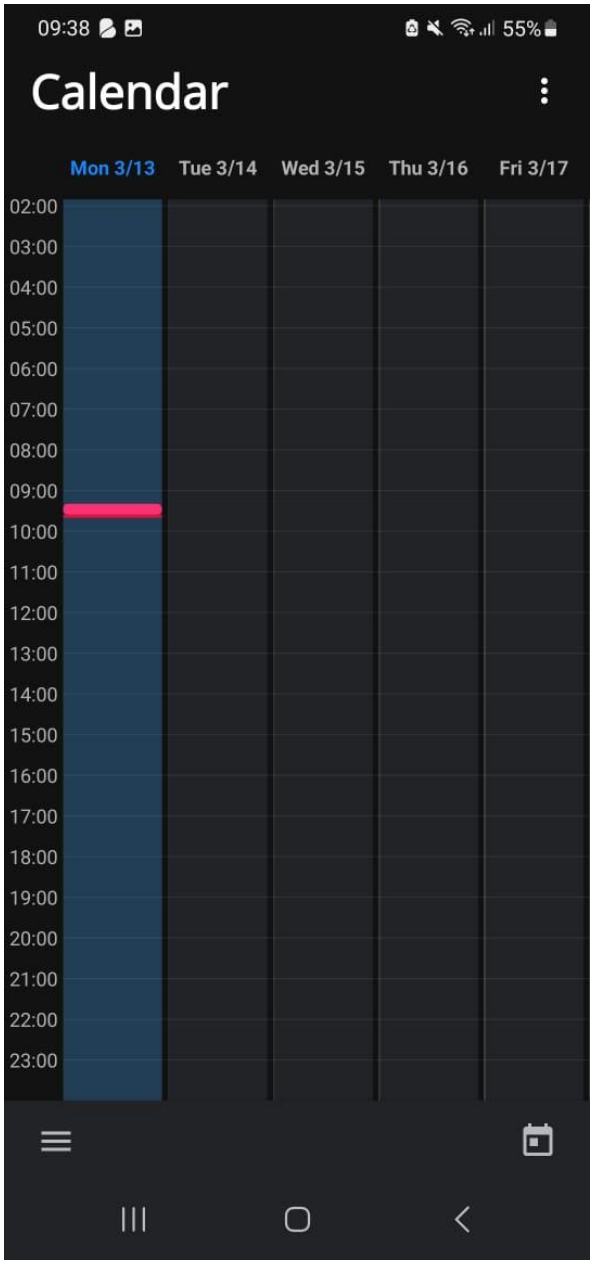

Figure 19 (Boosted, 2023)

The ‘Calendar’ Page

Display calendar function, so you can schedule and keep track of tasks by date.

Strengths and weaknesses of the app

Strengths:

- The ‘Export’ and ‘Backup & Restore’ features allow for greater information documentation and sharing.
- Simple language used, no possibility for confusion.
- No visible errors, it functions are stated.

Weaknesses:

- Too many useful or integral features hidden behind the ’Premium’ paywall.
- Unappealing web design.
- Not enough information to describe app functions.

Boosted – Critics review

Pros:

- Schoon (2020) says ‘Simple layout’
- Schoon (2020) says ‘You get great line-graphs that details your tracked time’
- Schoon (2020) says ‘Any tracked item can be easily added to the calendar’

Cons:

- Schoon (2020) says ‘Only available on Android devices’

Score: Google play stores rating is ‘4.5/5’ (Boosted, 2023).

Schoon (2020) says ‘If you just want a simple time tracker, Boosted is your best pick. It has a simple layout built around multiple one-tap timers at once, and can be even be organized into a to-do list.

Innovative features of the app

Helps you track your daily activities as well as allow for Backup and Restore functionality (Boostedproductivity, 2023). This function allows you to back any important data in a safe space for storage.

App Three: Toggl Track-Time Tracking

Overview of the app, including screenshots with descriptions

‘Flexible time tracker for teams of 1 to 1000’ – Toggle Track (2023)’s Google Play ‘About this app’ section.

Toggl Track (2023) allows you’re a group of people; either a group or employees, a family or a peer group; to group together and track their activities together.

Screenshots:

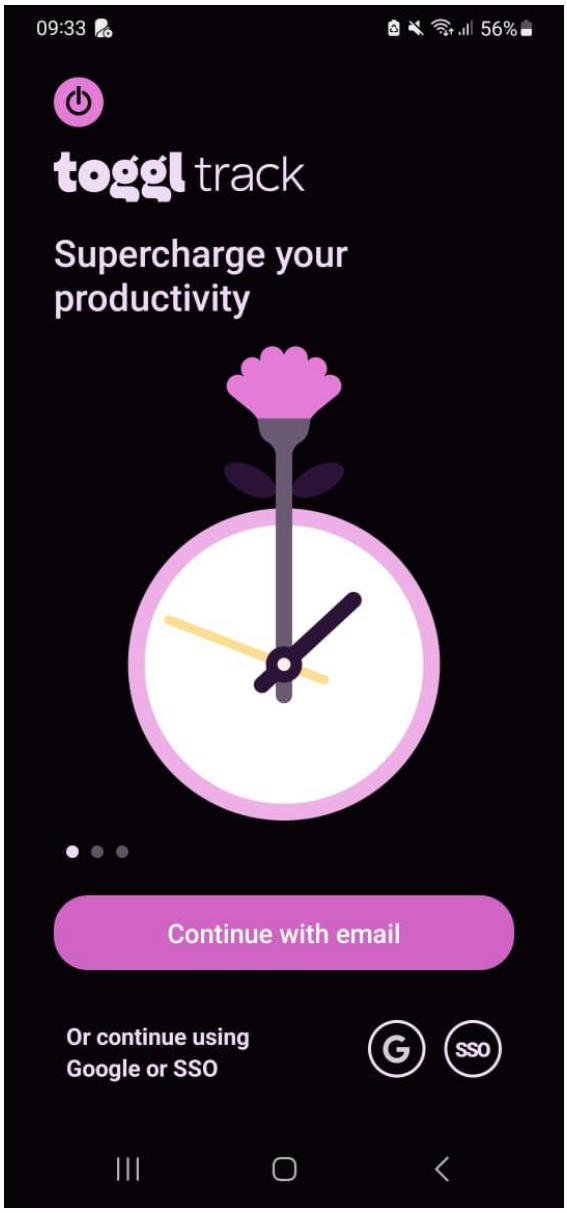

Figure 20 (Toggl, 2023)

The 'Sign in with Email or Google or SSO' Page

Allows you to specify how you will access the system. You can use your Email account, your google account or SSO (Single sign-on – sign into multiple applications with the same credentials).

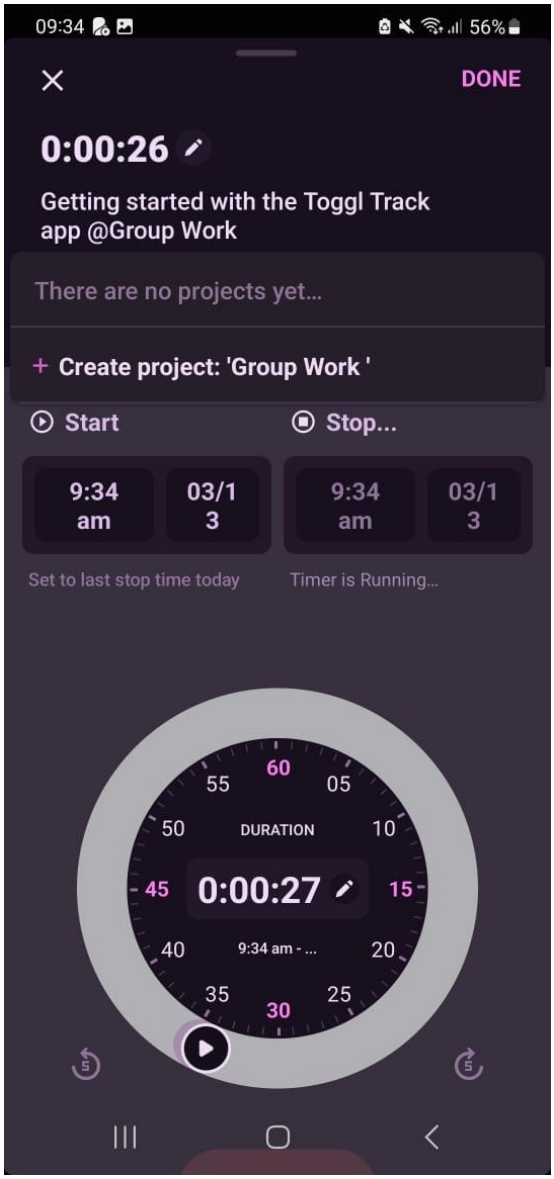

Figure 21(Toggl, 2023)

The ‘Project creation’ Page

Allows you to create projects and set their values.

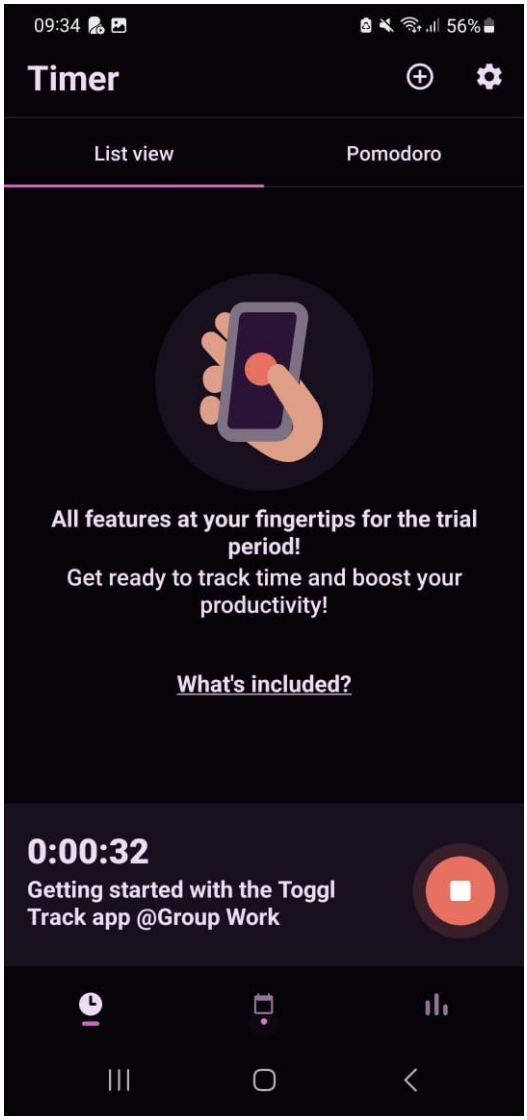

Figure 22 (Toggl, 2023)

The ‘Timer’ Page

Allows you to track time, you can use ’List view’ or the ‘Pomodoro’ feature.

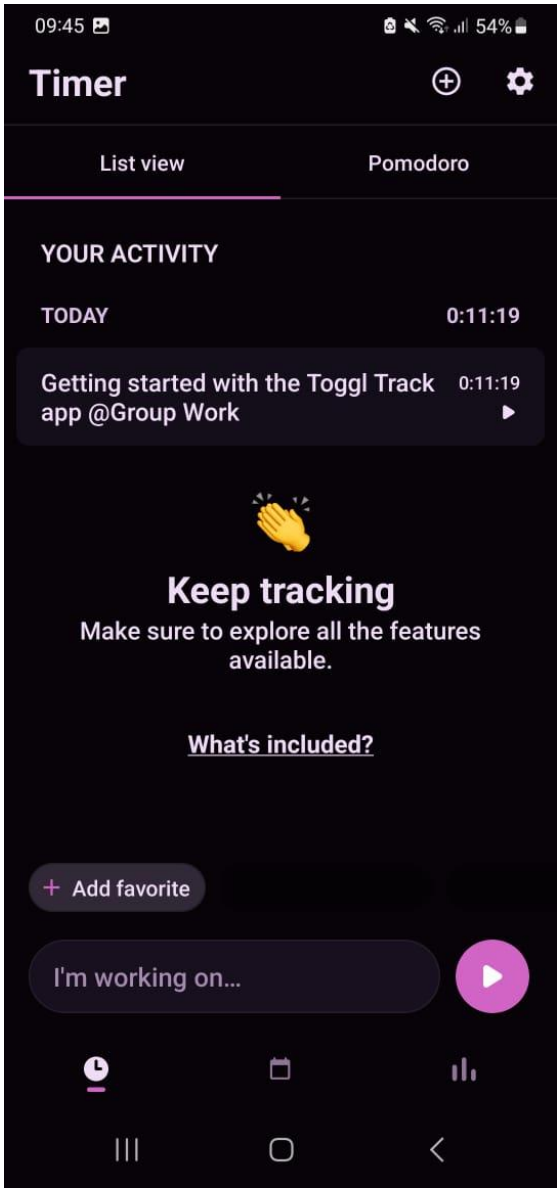

Figure 23 (Toggl, 2023)

The ‘Timer’ Page, ‘your activity’
Displays your current activity.

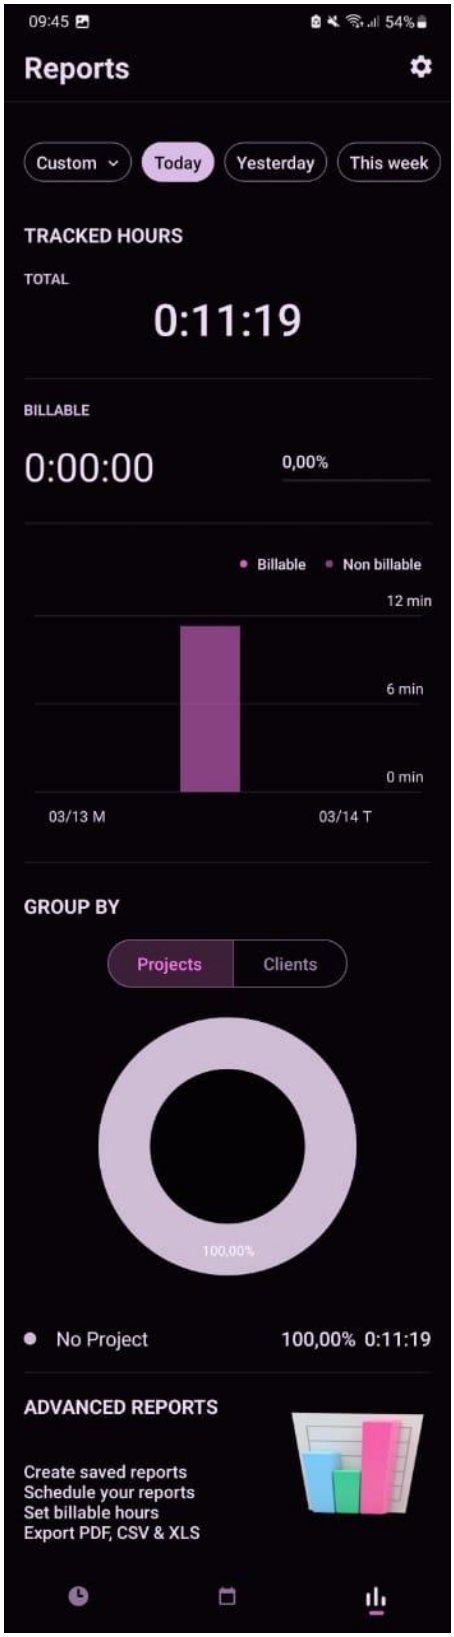

Figure 24 (Toggl, 2023)

The ‘Reports’ Page

Displays the data of your activity spent on the App, you can group your reports by ‘Projects’ or ‘Clients’.

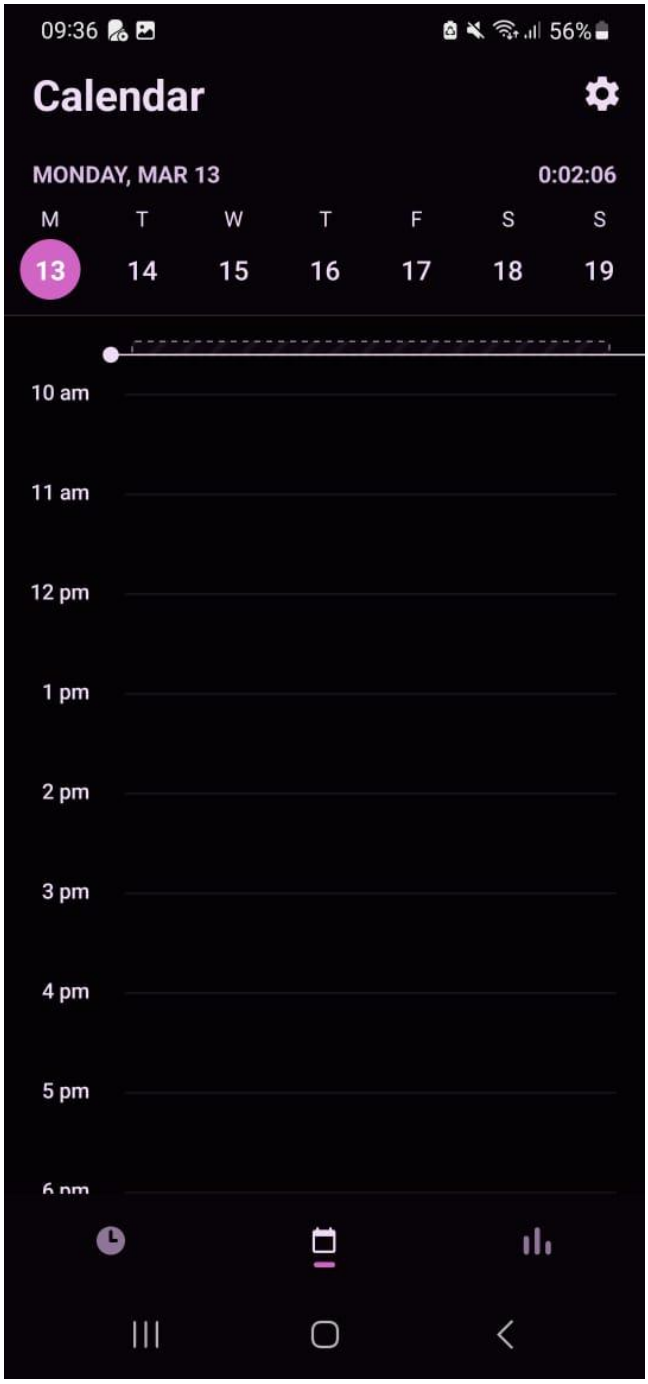

Figure 25 (Toggl, 2023)

The ‘Calendar’ Page

Allows you to schedule and track things by date as well as time.

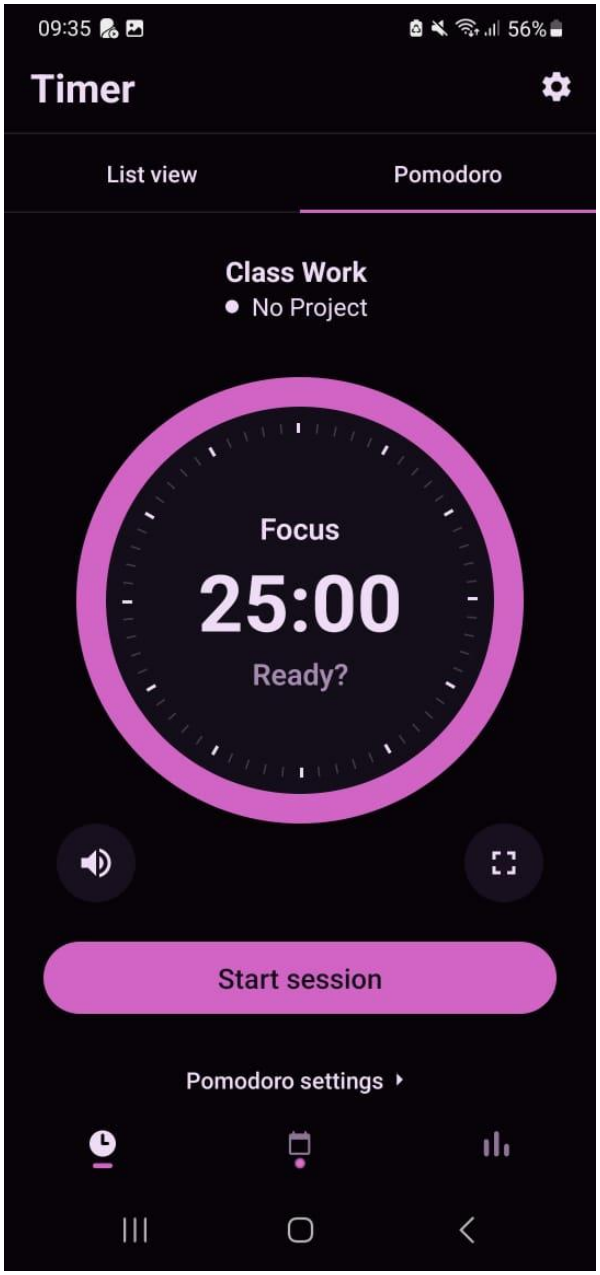

Figure 26 (Toggl, 2023)

The ‘Timer’ Page, ‘Pomodoro’ feature selected.

Allows you to count the focused minutes spent on a task.

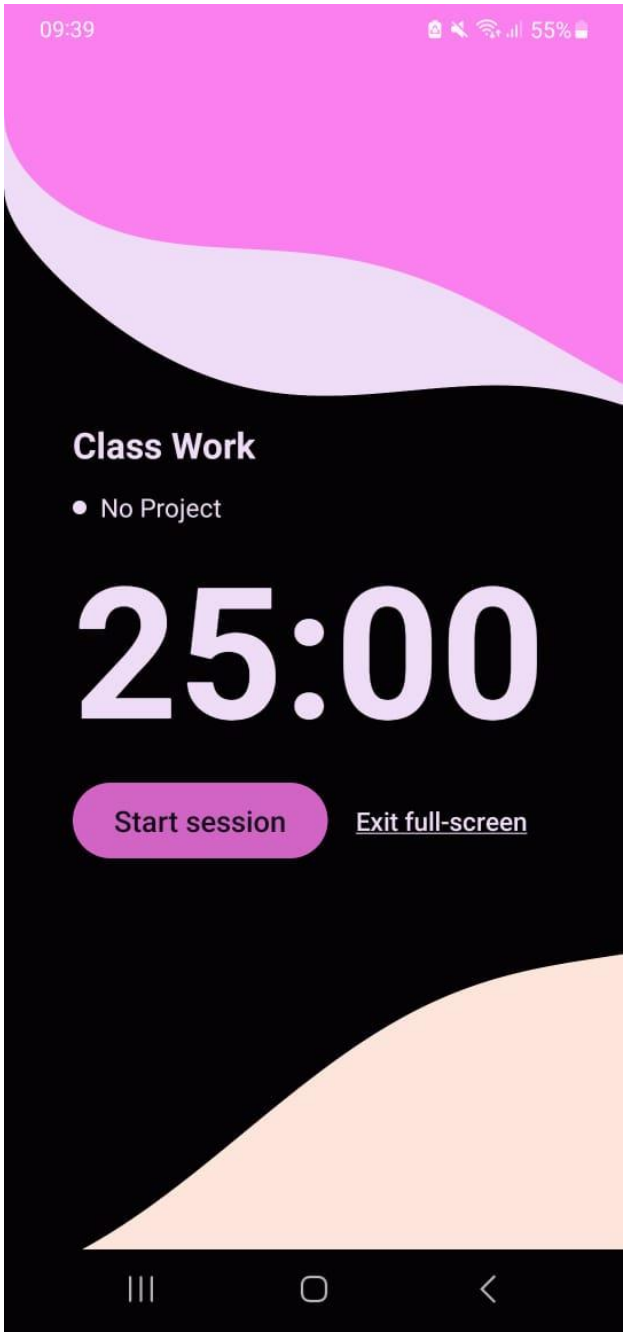

Figure 27 (Toggl, 2023)

The ‘Start session’ Page.
Allows you to start a session you have booked.

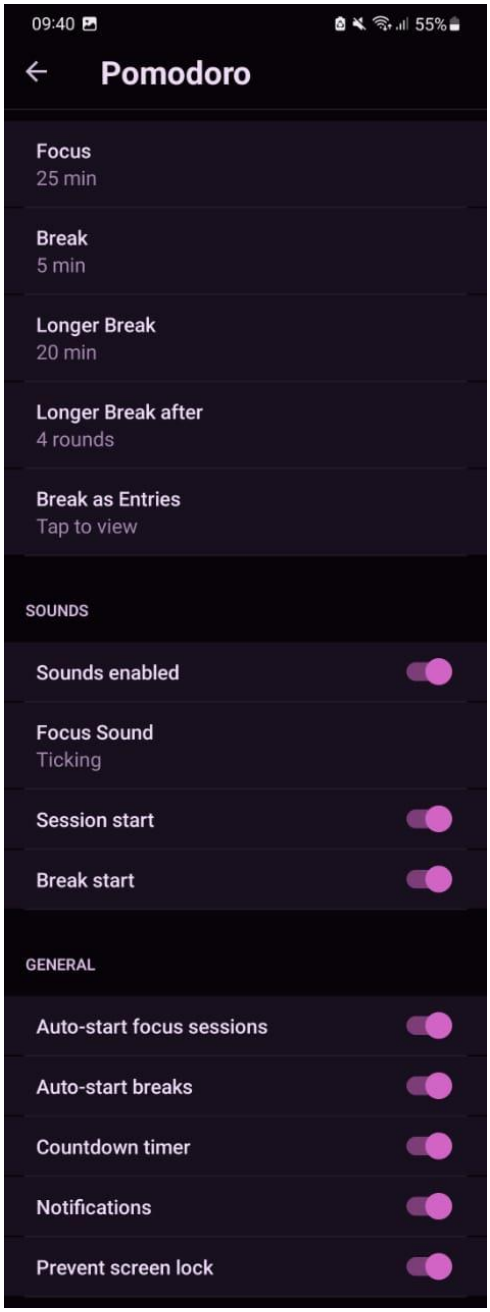

Figure 28 (Toggl, 2023)

The ‘Pomodoro’ Page, settings area

Allows you to set and adjust App settings for the ‘Pomodoro’ feature.

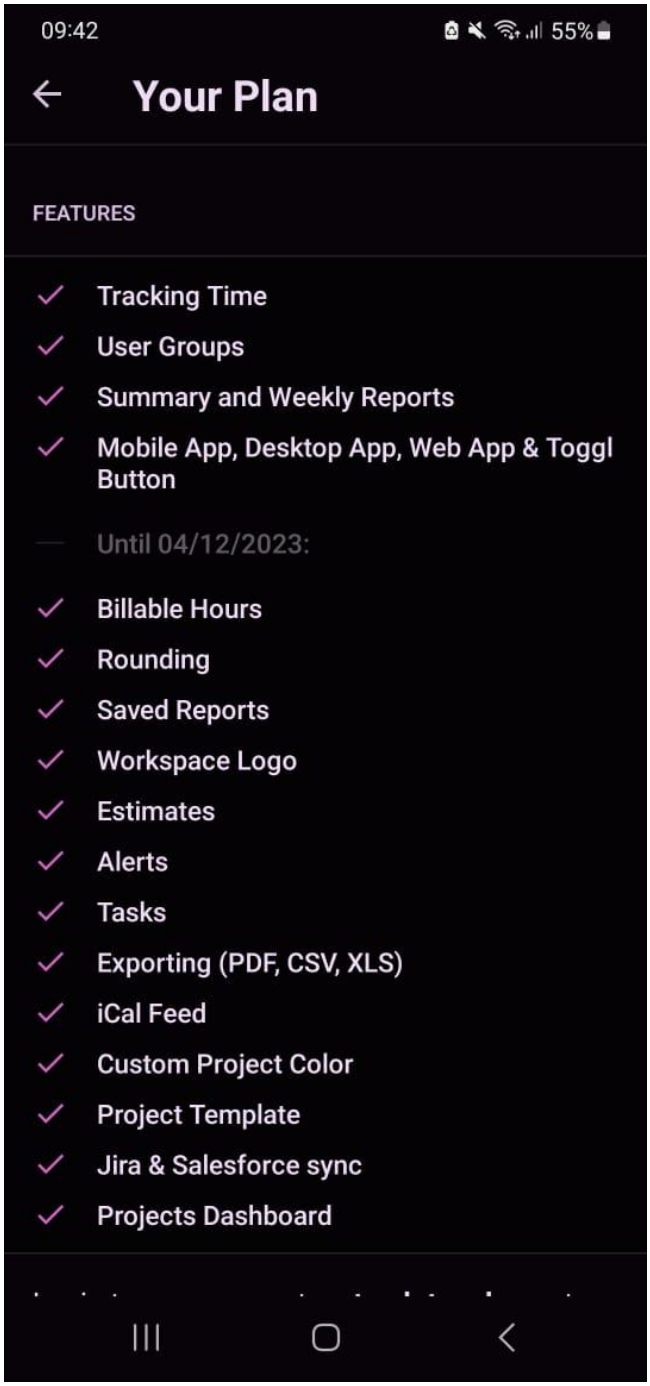

Figure 29 (Toggl, 2023)

The ‘Your Plan’ Page

Includes all your possible App needs, provided in a simple list.

Strengths and weaknesses of the app

Strengths:

- ‘Sign in…Email or Google or SSO’, this allows for multi-platform accessibility.
- Clear language used to name features.
- Decent Web Design used in application’s design.

Weaknesses:

- Bare minimum selection of features, a very basic application.
- Not descriptive enough in the functions of each of the features.
- Web pages are bloated with too many options for personalization.

Toggl – Critics Review

Pros:

- Duffy (2020) says ‘Generous free tier of service’
- Duffy (2020) says ‘Quick and nimble’
- Duffy (2020) says ‘Long list of supported integrations’

Cons:

- Duffy (2020) says ‘No invoicing, scheduling, or other features not specifically related to time-tracking’
- Duffy (2020) says ‘Expensive paid tiers’

Score: Duffy (2020) says ‘4/5’ (Toggl, 2023).

Duffy (2020) says ‘Toggl Track handles time tracking exceptionally well. It's intuitive to use, and it offers apps for all major platforms’

Innovative features of the app

Allow for a maximum of 100 teams to make use of it, which make it ideal for a company that needs to manage a large number of employees in a structured manner (Toggl Track, 2023).

Infographic comparison of all three apps

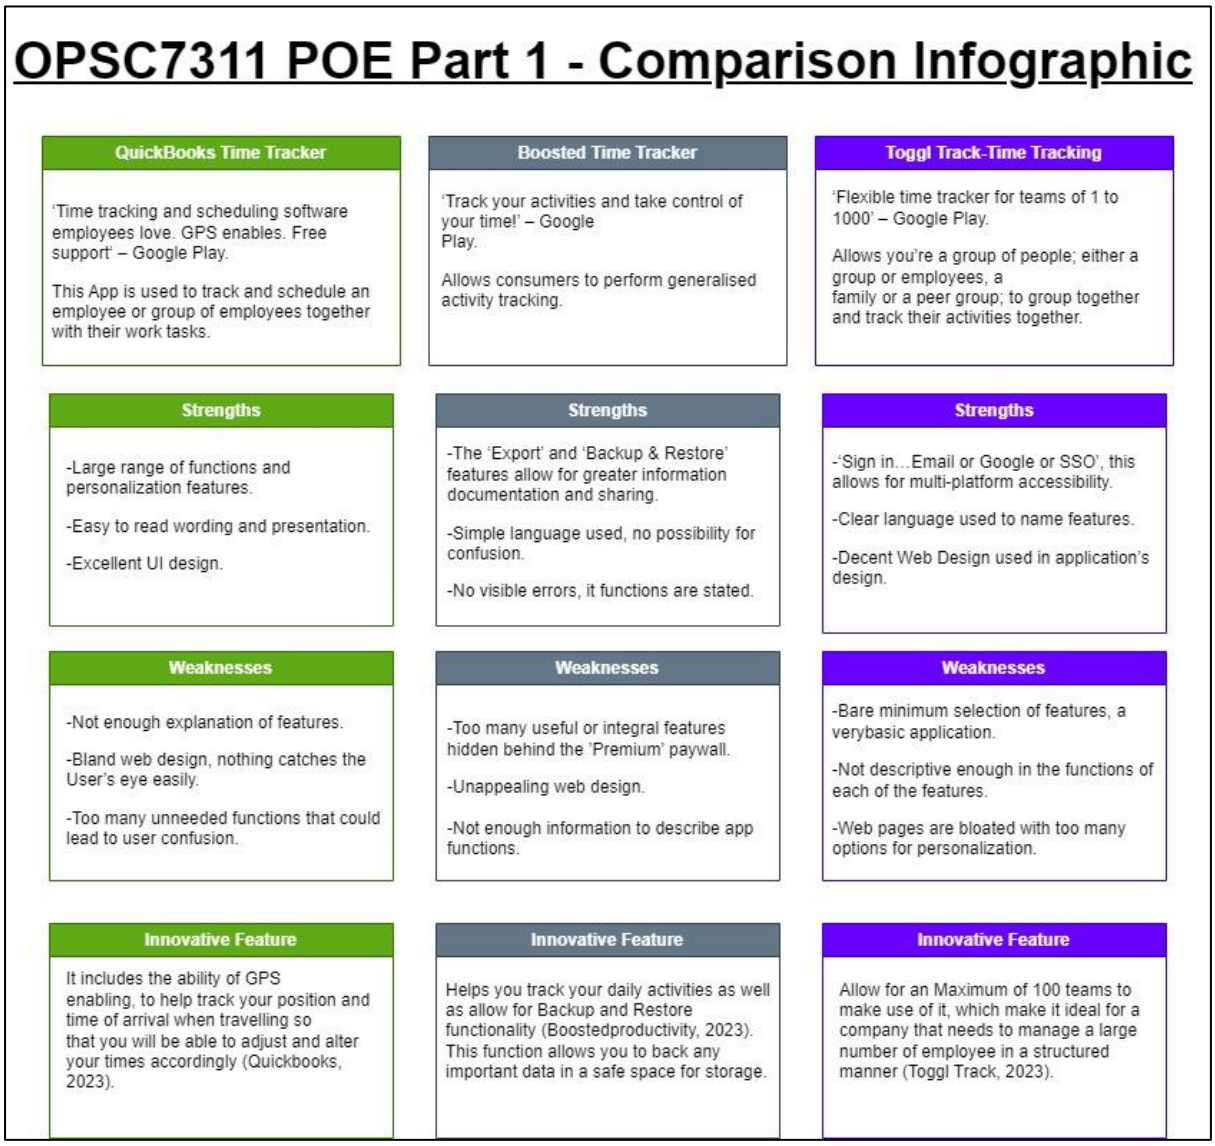

Figure 30

Best features from all the apps we would like to include

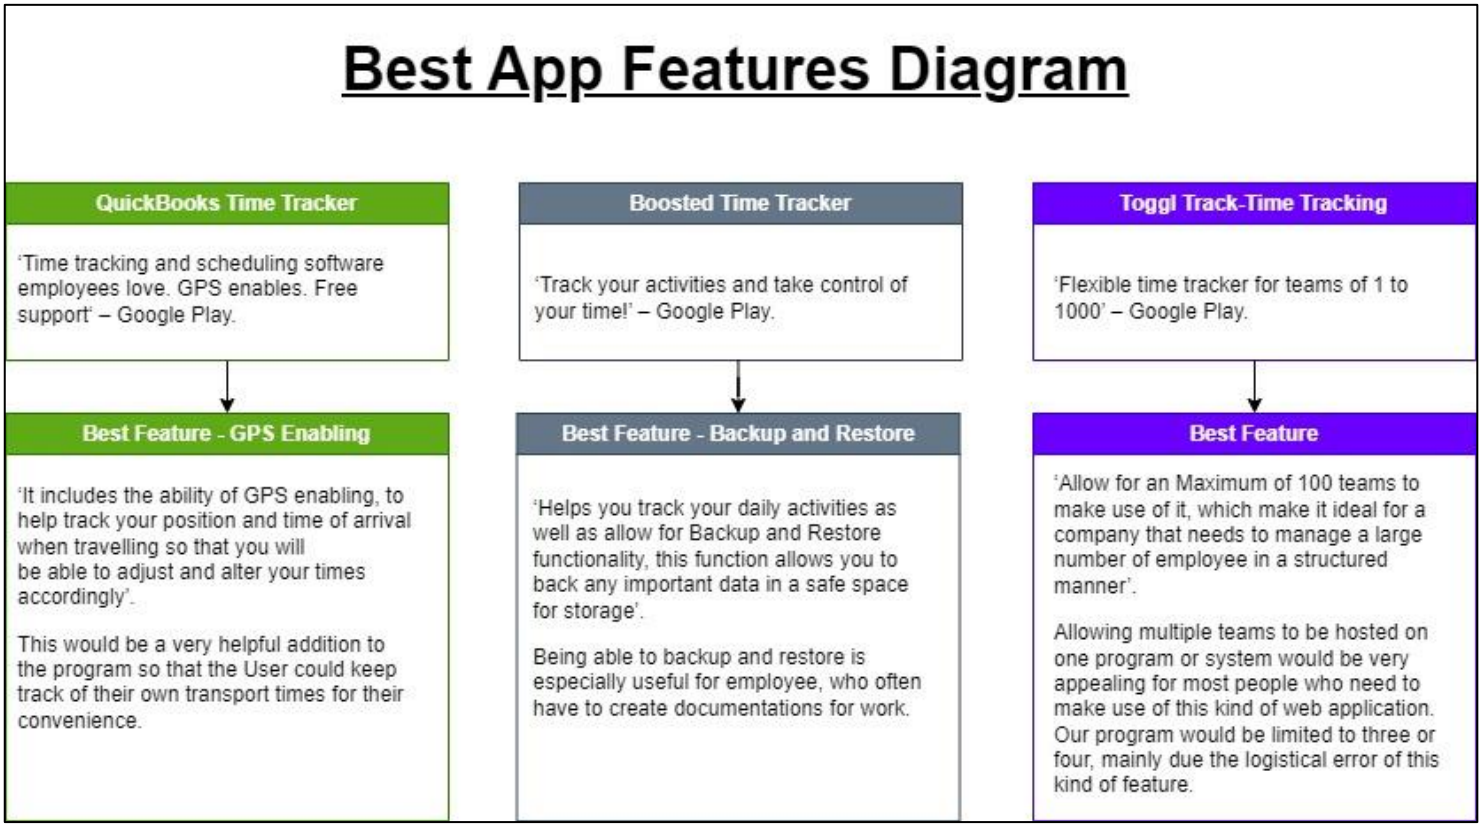

Figure 31

Conclusion

We can conclude that each of the three applications have useful characteristics that make them ideal for their intended purpose. We will be taking notes from each example here and use them to inform our decisions in the future.

(‘Research’ Main text word count: 1760(give or take) (1500 to 2000 words))

Part 1 — Planning and Design

Introduction

The purpose of this document is to fulfil the needs of the OPSC7311 POE (Assignment), specifically for Part 1 of the assignment. This document will be sued in the research, Planning and Designing section of our overall POE. This document is the document following the completion of the previous POE Part 1 Research document. It is used in order to plan out the needs of our program before we develop a prototype, after that we will begin designing the features and visual presentation of it.

Overview

This application is a time-tracking application, that must allow the user to record and view time that being spent working on the projects of their clients.

Name:
‘CRZ - Time Tracker(tm)’

This name used our groups name and describes the use of it.

Icon:

Figure 32

Innovative Features Descriptions:

1)GPS enabler:

We want the Application to be able to track a person's current location, specifically so that they can track how long it may take for them to get from their position to their workplace for example.

2)Back and Restore function:

This is so that a User may be able to backup and restore any valuable data they need.

3)Multiple Teams capability:

This is so that a person may be able to include up four teams inside the application's one account.

Detailed list of the requirements

Minimum Requirements for the application

The following requirements are guidelines stipulated by the *Open Source coding (introduction) module manual* (IIE, 2023: 4):

The user must be able to log in to the app using a username and password:

The user will gain access to the system by entering their account credentials (username and password).

The user must be able to create categories that the timesheet entries will belong to:

The application will need to have a ‘category’ function inside.

The user must be able to create a timesheet entry, specifying at least the date, start and end times, description, and category:

User will be able to enter details about timesheets.

Must be able to optionally add a photograph to each timesheet entry:

Added timesheet page functionality.

User must be able to set a minimum daily goal for hours worked, as well as a maximum daily goal:

This data will be entered by the user and then stored inside the application.

The user must be able to view the list of all the timesheet entries created during a user selectable period. If a photo was stored for an entry, the use must be able to access it from this list:

The timesheets created by a user will be stored and listed so that the user can see and access them.

User must be able to view the total number of hours spent on each category during a user selectable period:

The program will quantify the hours spent on each category data and perform calculations to present this data to the User.

The user must be able to view a graph showing the total hours worked each day over a user selectable period. The graph must…display the minimum and maximum goals (final POE only):

The program will have to take the data and presented it in a graphical format for the User.

The app must display in a visual format how well the user is doing with staying between their minimum and maximum hour goals over the past month (final POE only):

The program will take the saved data and presented it in a graphical format.

The data must be stored in an online database (final POE only):

The created program must be able to send data to a database where it will be stored in an organised manner.

Our own features to be added:

1)GPS enabler:

We need the Application to be able to track a person's current location, to track can track how long it may take to get from their position to their workplace. The application needs to be able to calculate the distance between two positions.

2)Back and Restore function:

A User will be able to backup and restore data needed from inside application database.

3)Multiple Teams capability:

Users will be able to include four teams inside their one account and to be able to manage them all inside of application. The applications needs to be able to properly stores the correct data in each separate account.

User interface design

Screenshots:

Figure 33

1)'Welcome' Page
This is the welcome that will pop up before a User accesses an account, 'Proceed' takes them to the next page.

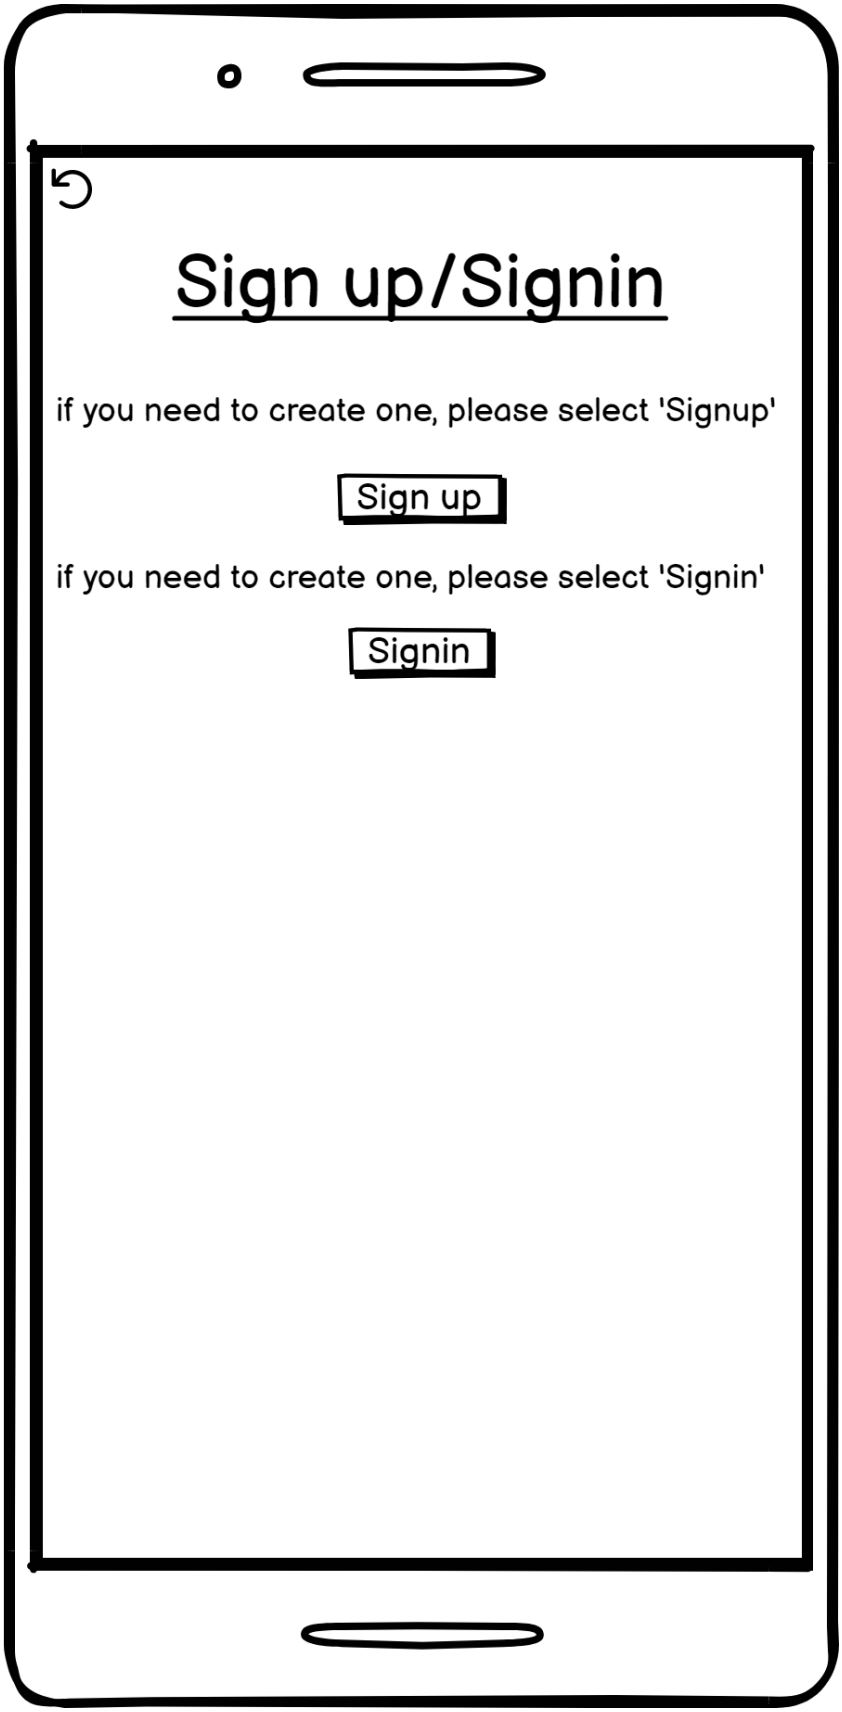

Figure 34

2)Sign in/Signup Page
This is where a User can create an account or access one made previously.

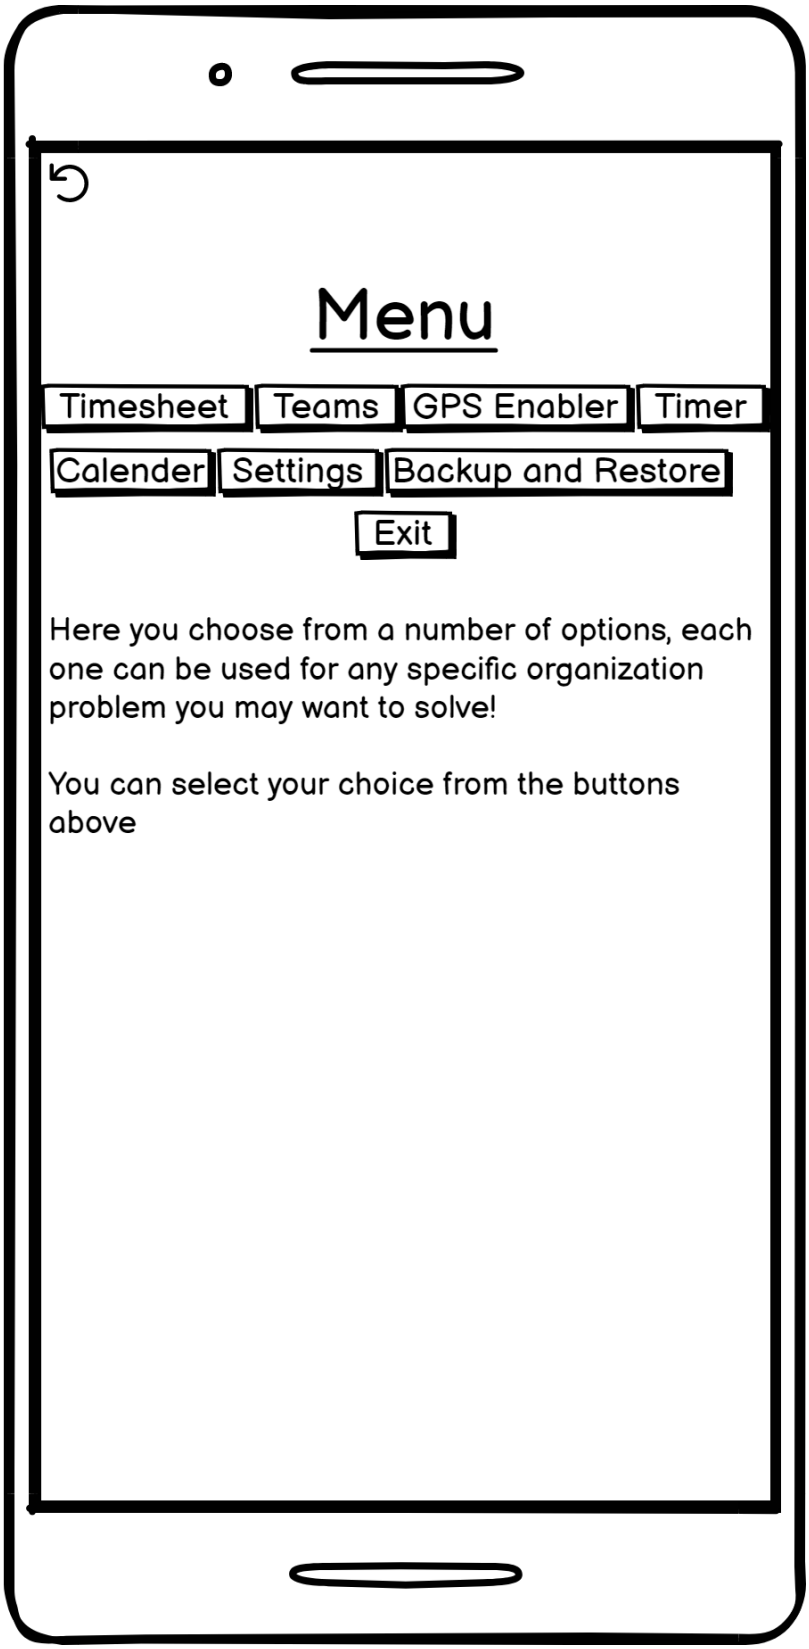

Figure 35

3)‘Menu’ Page

Here a User can pick from the features they want to use.

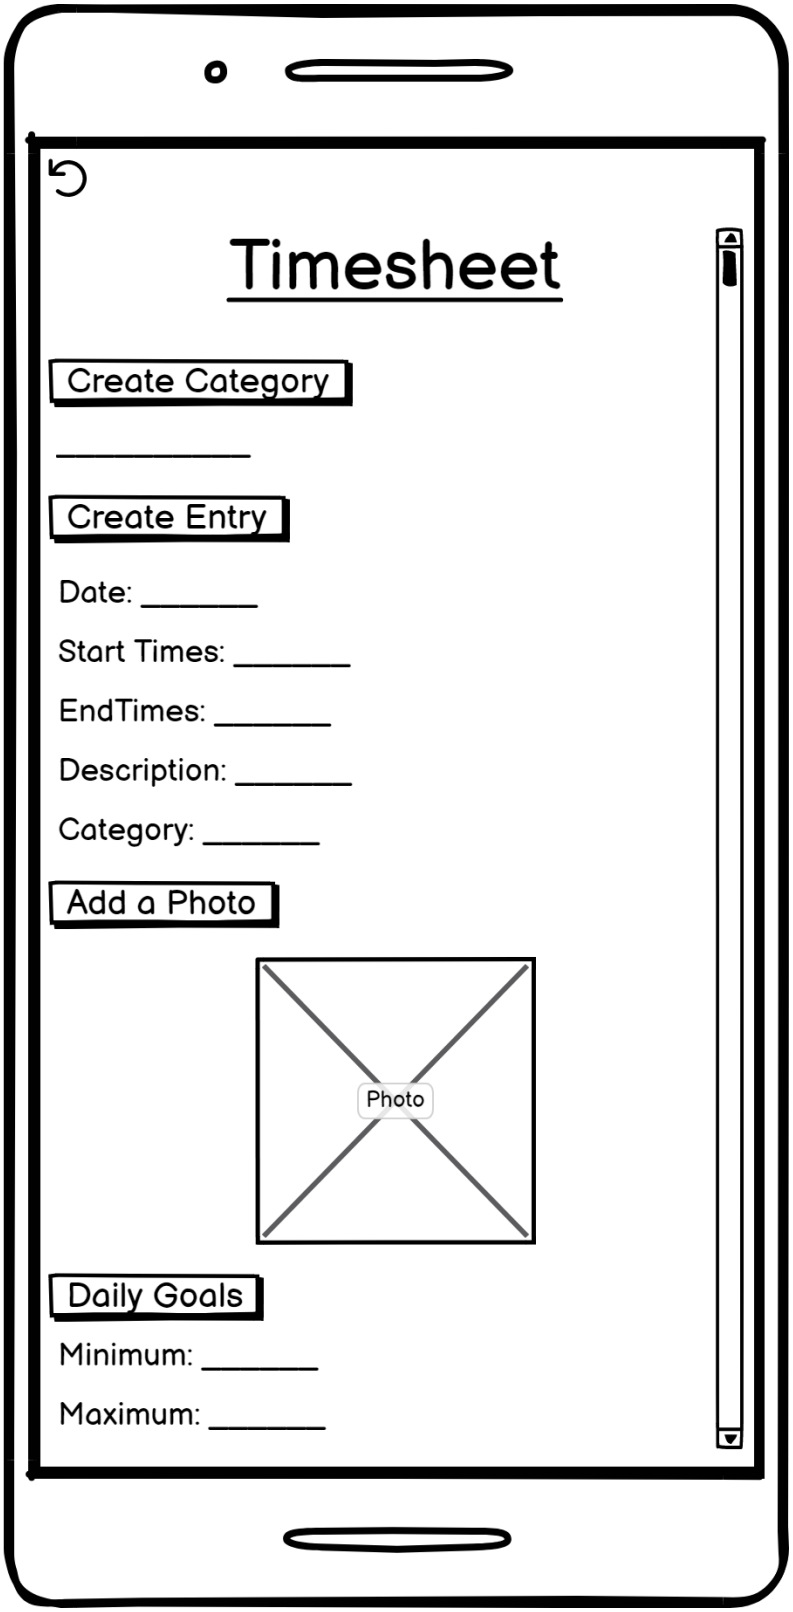

Figure 36

4)‘Timesheet Page

This page allows Users to create or manage their timesheets.

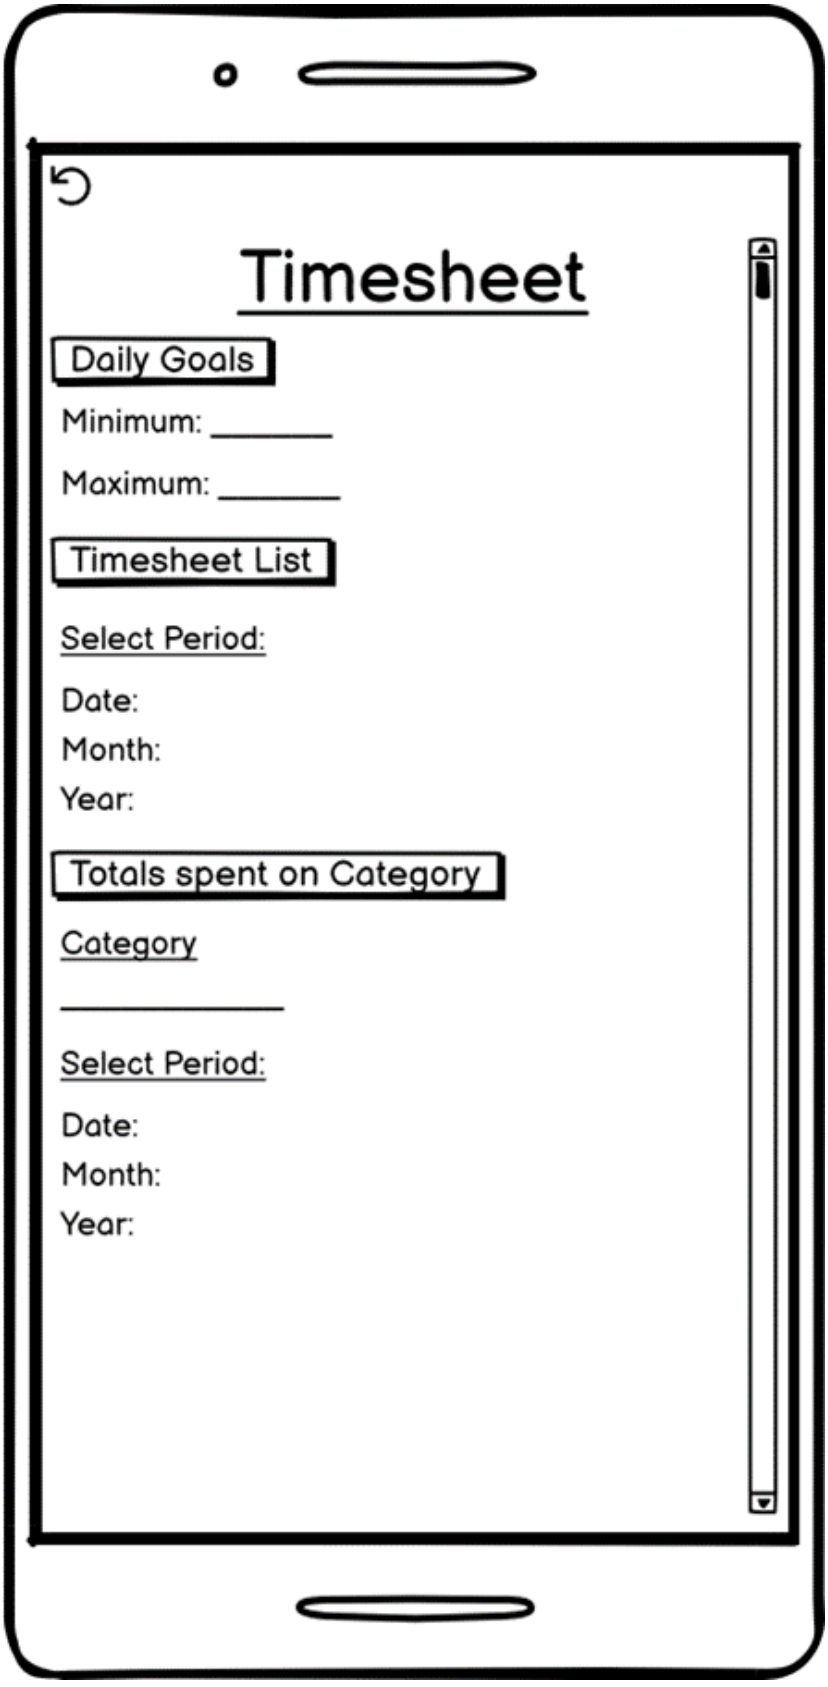

Timesheet
Daily Goals
Minimum: _____
Maximum: _____
Timesheet List
Select Period:
Date:
Month:
Year:
Totals spent on Category
Category
_____
Select Period:
Date:
Month:
Year:

Figure 37

Figure 38

5)‘Teams’ Page

This page allows the user to create and manage their teams.

Figure 39

6)GPS Enabler

This Page allows a User to activate the 'Location' function of the Web Application.

This can be used to help Users track their distance from a current location to where they need to be, for easier time estimation.

Figure 40

7)'Timer' Page

Allows the User to track time spent on a task.

The User can:

- Set Timer: Adjusts the Hours, Minutes and Seconds of the Timer.
- Begin Timer: This will start the Timer.

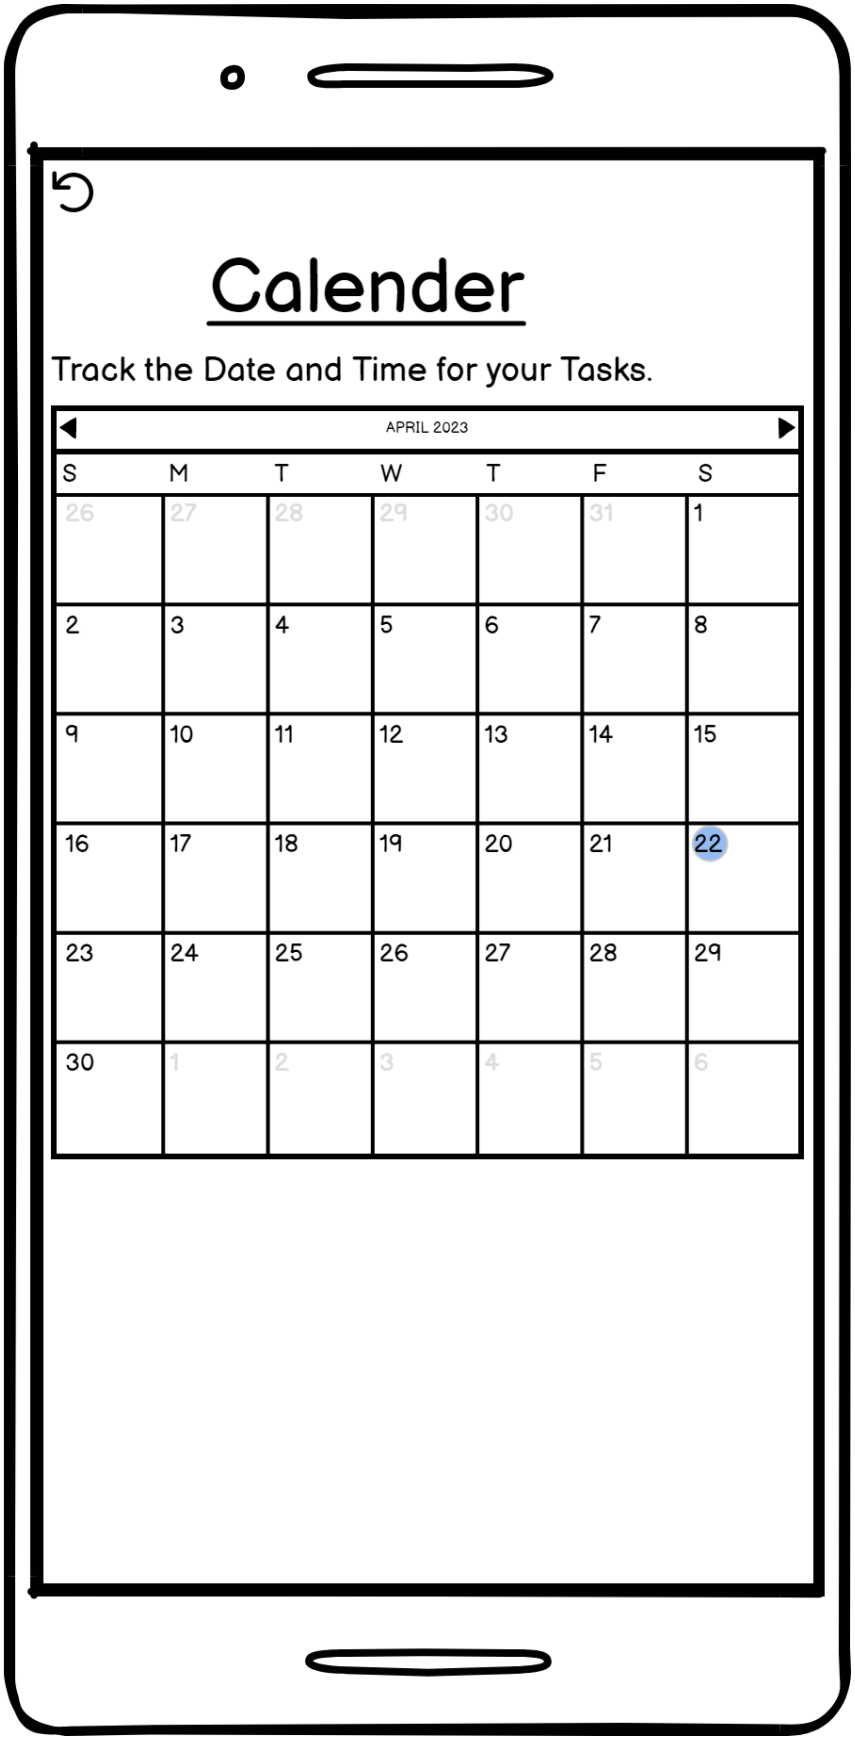

Figure 41

8)‘Calendar’ Page
This Page allows Users to track their work by date.

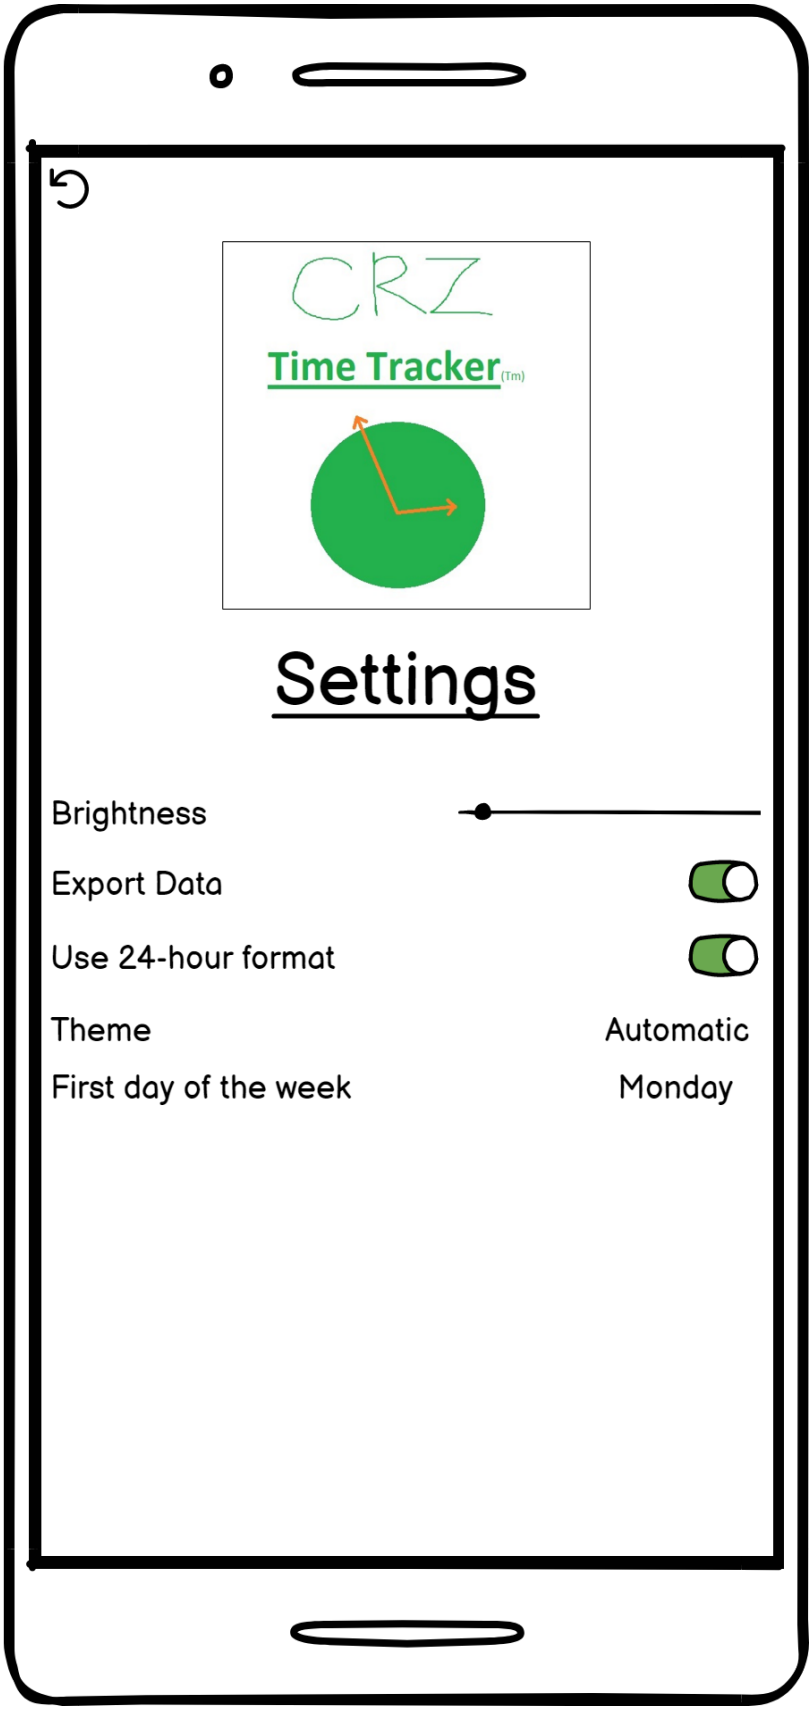

Figure 42

9)'Settings' Page

Allows Users to adjust the app.

User can adjust the following:

- Brightness: Changes how bright the app displays on their phone.
- Export Data: Allows them to export data to the cloud service.
- Use 24-hour format: It causes the app to use the numbers 00:00 (midnight) until 23:59 to tell the time.
- Theme: Allows to adjust the UI visuals.
- First day of the week: Set's first day of week, which affects the dates.

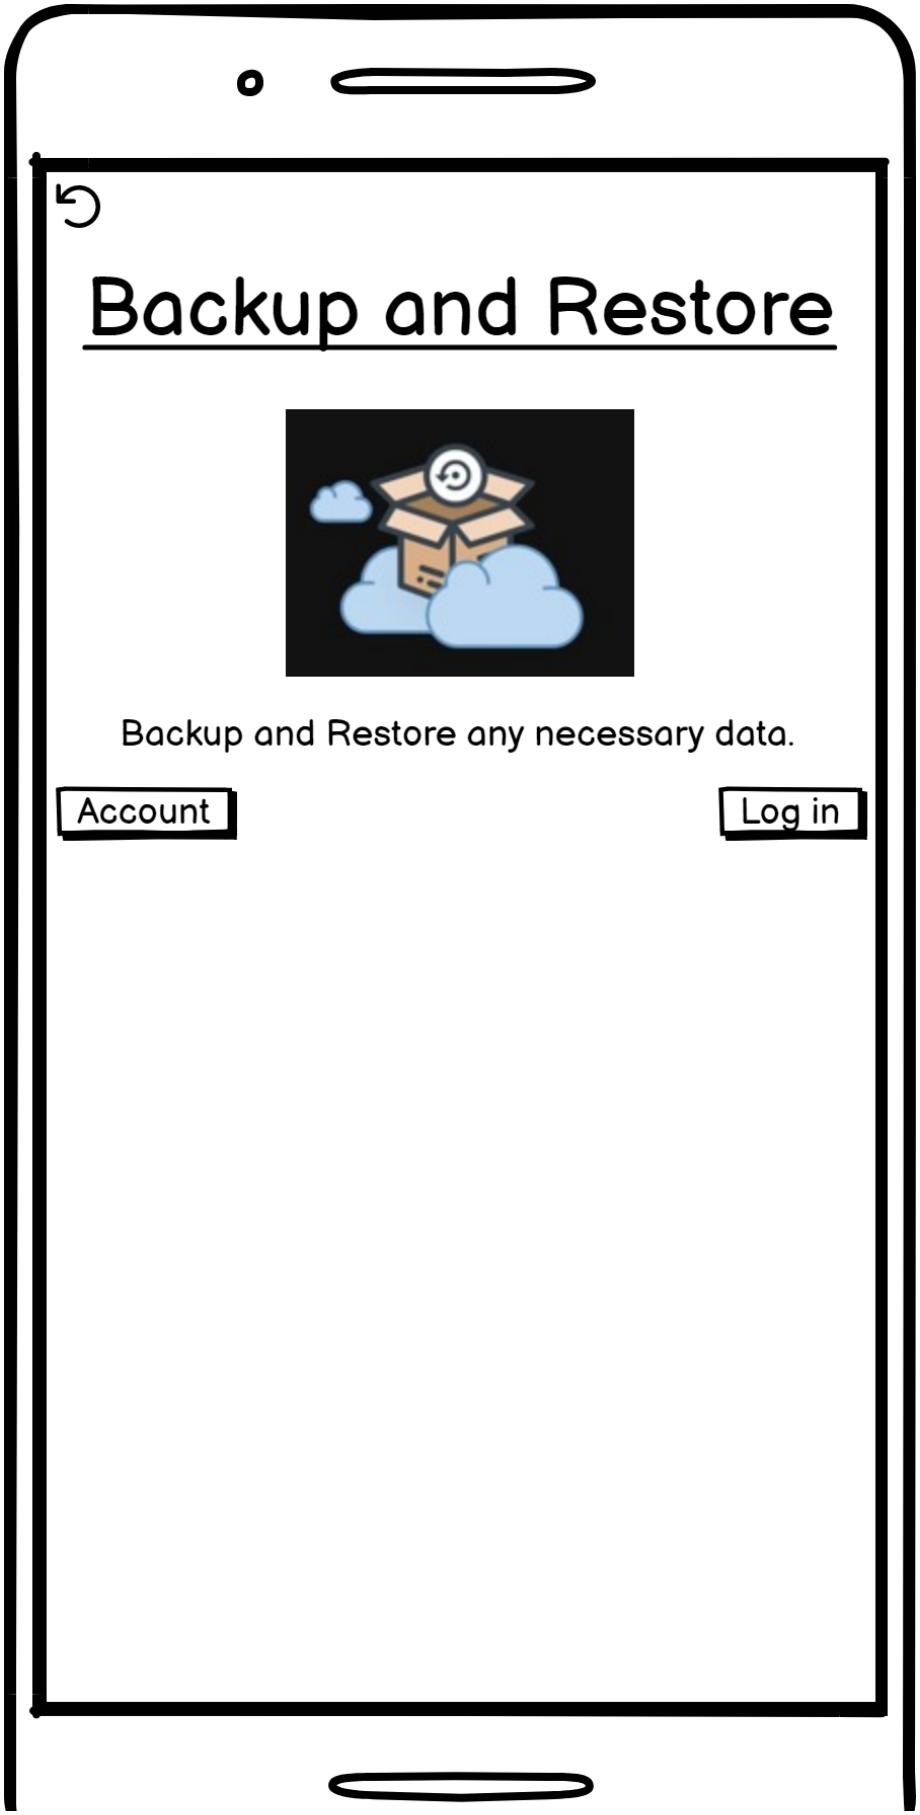

Figure 43

10)‘Backup and Restore’
This Page allows a User to Backup any data well as Restore any data that was somehow lost.

‘Account’ takes them to their current Account.

‘Login’ Lets them login into another account.

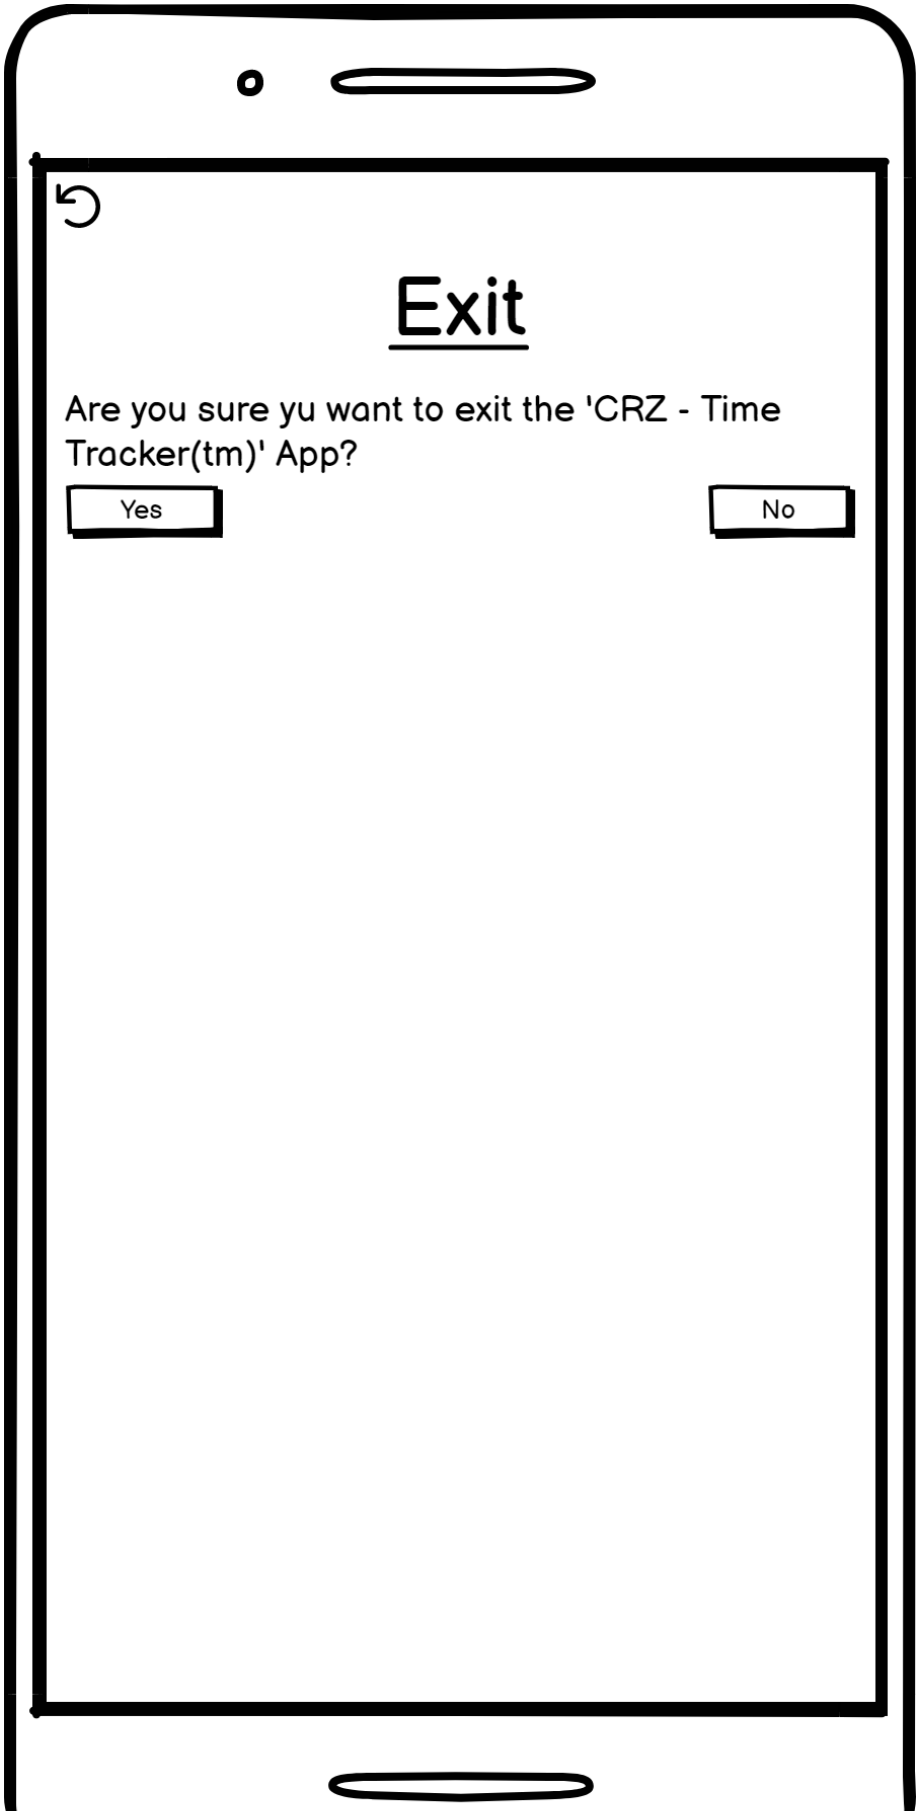

Figure 44

11)‘Exit’ Page

This Page is opened when a User requests to exit the Web Application.

The ‘Yes’ closes the app, the ‘No’ returns Users back to the menu.

Navigation Diagram, for the Web App

Figure 49

Conclusion

We can see that this document is a competent enough summarization of the different aspects needed for the Planning and Design of our time tracking web application. This document has laid out the logistical concerns and requirements needed before prototype visualization. The Design of the application has also been laid out clearly enough.

('Planning and Design' = 1091 Words so far (MINIMUM of 1000 to 1500))
